 - viii. GH-8 City-Owned Facilities**

Appendix 1: Year Two Program Summary

Appendix 2: Next Reporting Year Program Summary

Appendix 3: Proposed Changes to SWMP

Appendix 4: Certification

1.0 PURPOSE OF PROGRAM

The objective of this Stormwater Management Program (SWMP) is to develop a program pursuant to which the City of Temple can reduce the discharge of pollutants in stormwater runoff to the maximum extent practicable (MEP). This Program was developed with much coordination between the City and the community to customize a program for Temple that meets state and federal program requirements and also utilizes current activities, addresses issues that are important to the community, and is economically feasible.

2.0 STATUS OF PERMIT COVERAGE

The City of Temple submitted its NOI and SWMP to the Texas Commission on Environmental Quality (TCEQ) on June 4, 2014 for coverage under the Texas Pollutant Discharge Elimination System (TPDES) General Permit for Stormwater Discharges from Small MS4s, General Permit No. TXR040037.

The City complied with public notice requirements by publishing notice in the newspaper of largest circulation in Bell County, the Temple Daily Telegram.

The public comment period began on the first date that the notice was published and ended thirty days later. The City was not instructed to publish a notice of public meeting and hold a public meeting in Bell County.

The permit authorization and approval is attached.

3.0 NOTICE OF CHANGE

Changes may be made to the SWMP during the permit term. Changes that are made to the SWMP before the NOI is approved by the TCEQ must be submitted in a letter providing supplemental information to the NOI.

Changes to the SWMP that are made after TCEQ approval of the NOI and SWMP may be made following written approval of the changes from the TCEQ, except that written approval is not required for the following changes:

- (a) Adding components, controls, or requirements to the SWMP; or replacing a BMP with an equivalent BMP, may be made by the permittee at any time upon submittal of a notice of change (NOC) form to the address specified on the form to the TCEQ.
- (b) Replacing a less effective or infeasible BMP specifically identified in the SWMP with an alternate BMP may be requested at any time. Changes must be submitted on an NOC form to the address specified on the form. Unless denied in writing by the TCEQ, the change shall be considered approved and may be implemented by the permittee 60 days from submitting the request. Such requests must include the following:
 - (1) An explanation of why the BMP was eliminated;
 - (2) An explanation of the effectiveness of the replacement BMP; and
 - (3) An explanation of why the replacement BMP is expected to achieve the goals of the replaced BMP

4.0 ANNUAL REPORTING

A concise annual report must be submitted by the City of Temple to the Executive Director of the TCEQ within ninety days of the end of each permit year of the permit term. The annual report must be prepared and submitted regardless of whether the City's SWMP and NOI have been approved by TCEQ. The permit term began when the TPDES Small MS4 General Permit became effective on December 13, 2013. The permit years and deadlines for annual reports are specified below.

<u>Year</u>	<u>Reporting Cycle</u>	<u>Annual Report Due Date</u>
1	10/1/2013 – 9/30/2014	12/30/2014
2	10/1/2014 – 9/30/2015	12/30/2015
3	10/1/2015 – 9/30/2016	12/30/2016
4	10/1/2016 – 9/30/2017	12/30/2017
5	10/1/2017 – 9/30/2018	12/30/2018

A copy of the annual report must be readily available for review by authorized TCEQ personnel upon request. The report must contain a number of elements including:

- Status of compliance with permit conditions, an assessment of the appropriateness of the identified BMPs, progress towards achieving the statutory goal of reducing the discharge of pollutants to the MEP, the measurable goals for each of the minimum control measures (MCMs), and an evaluation of the success of the implementation of the measurable goals
- Status of any additional control measures implemented by the permittee
- Any minimum control measures (MCMs) activities implemented before permit issuance may be included as part of the first year's annual report.
- A summary of the results of the information (including monitoring data) collected and analyzed, if any
- A summary of activities planned for the next reporting cycle
- Proposed changes to the SWMP
- Number of municipal construction activities authorized under this general permit and total number of acres disturbed
- Number of non-municipal construction activities that occurred within the jurisdiction

This report serves as the Year 2 Annual Report for the City of Temple for the period December 13, 2014 through December 12, 2015 and contains those elements outlined above. The annual report is organized by Minimum Control Measures with TWP–page summaries of the Year 7 activities; Year 8 planned activities, proposed changes and documentation provided for each BMP with implementation activities scheduled for Year 7. Documentation that the City has achieved the measurable goals is attached to each BMP annual report summary.

Phase II (Small) MS4 Annual Report Form
TPDES General Permit No. TXR040037

Annual Report Period: 12/13/2014 – 12/12/2015

Re: Phase II MS4 Year Two Annual Report Transmittal for CITY OF TEMPLE
TPDES Permit Number: TXR040037

Dear Sir/Madam;

This letter serves to transmit the Year Two Annual Report for the Texas Pollutant Discharge Elimination System Small Municipal Separate Storm Sewer System General Permit, Authorization Number TXR040037 for the CITY OF TEMPLE.

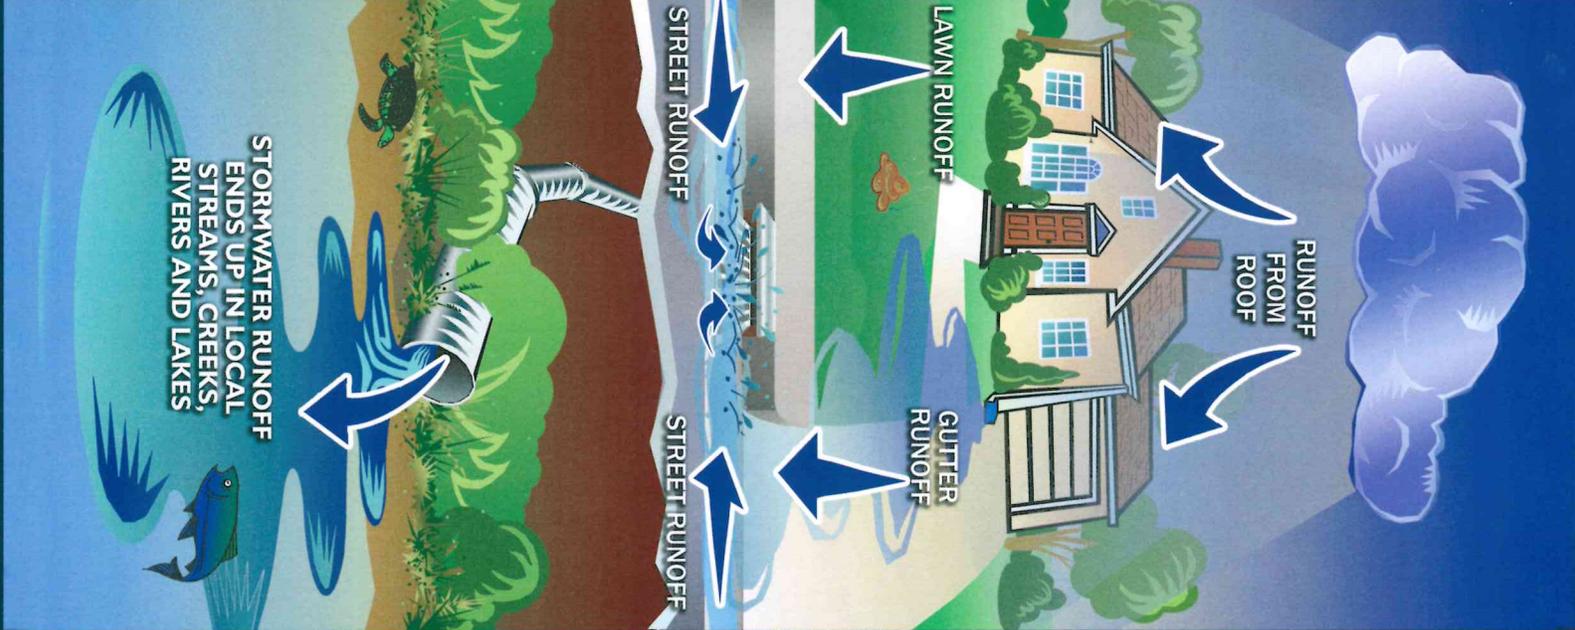

As required by the general permit, a copy of this submittal has also been mailed to the TCEQ's regional office in Waco, Texas.

Should you have any questions or need additional information, please feel free to contact me at 254/298-5660.

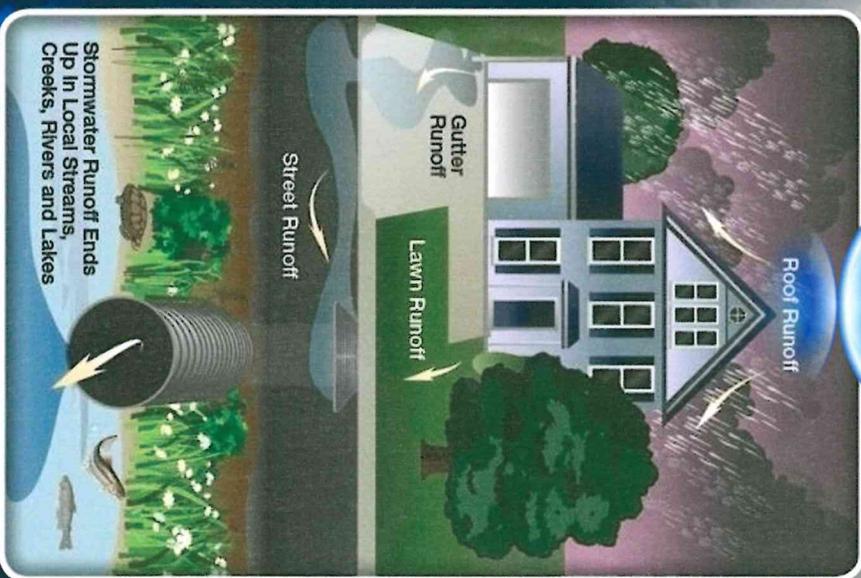

Sincerely,

A handwritten signature in blue ink, appearing to read "Don Bond", is written over a white background.

Watershed/Nonpoint Source Model

The popular 3D EnviroScape® Watershed/NPS model provides a hands-on, interactive demonstration of the sources and effects of water pollution -- and allows you to demonstrate ways to prevent it. Easily demonstrate how storm water runoff carries pollutants through the watershed to a pond, lake, river, bay, or ocean – and the best management practices to prevent this type of pollution from occurring. The overall watershed/stormwater concept is effectively communicated to all ages!

The popular 3D EnviroScape® Watershed/Nonpoint model provides a hands-on, interactive demonstration of the sources and effects of water pollution -- and allows you to demonstrate ways to prevent it. Easily demonstrate how storm water runoff carries pollutants through the watershed to a pond, lake, river, bay, or ocean – and the best management practices to prevent this type of pollution from occurring. The overall watershed/stormwater concept is effectively communicated to all ages --the landscape map provides two waterways that flow into a larger water body, which can be representative of a lake, river, bay, or ocean depending on your community.

Sources and prevention practices demonstrated focus on areas and issues such as –

- Residential
- Stormwater and storm drains

- Forestry
- Transportation
- Recreation
- Agriculture
- Construction
- Industrial (factory, treatment plant)

This popular model can be used to represent any community anywhere in the world!

Contents: Nonpoint source landscape top (topographical map) with storm drain pipe, clear base, 4 bridges, 5 houses, barn, factory, treatment plant, 4 trees, 2 golf flags, 3 cows, 2 cars, tractor, construction vehicle, and best management practices such as buffer strips, clay for making berms, manure container in addition to soil, oils and chemicals (cocoa, drink mixes and oil mix), watercatcher container, rainmaker (spray bottle), water plug, and easy-to-use peer-reviewed User's Guide.

Dimensions Assembled (approx): 25" x 30" x 7"

Parts may vary slightly due to supplier changes and updates.

POPULAR PAIRINGS: Pair with Coastal or Wetlands to expand the size of your watershed – or Buy 2 NPS/Watershed and use them side by side as a polluted watershed and other that uses preventative practices to keep it clean.

For any assistance in pairing with other models and kits, or tailoring this model to meet your specific needs, please contact us at learn@enviroscares.com

SHIPPING RATES: The rate charged for shipping is based on the dimensional weight and ship to location. On the checkout page you will be shown the cost of shipping. *International Customers:* Once your order is received, should we be successful in finding better shipping rates than you have already paid, we will process any credits and advise you of any adjustment. In no event will your shipping rate increase.

SALES TAX: At this time, we are only obligated to collect sales tax on sales from Virginia customers who are not tax exempt. Should this apply to your organization, we will notify you prior to assessing the tax.

DOMESTIC & CANADIAN SHIPMENTS: We use UPS Ground for Domestic and Canadian shipments (after you process your order, your shipment will go out within 7 working days). In the Checkout process you can "expedite" your order by choosing UPS Overnight, 2nd-day, 3-day delivery and your order will go out the next business day. If we anticipate a longer lead time, it will be noted in the item description. If you have any questions about the lead time on a specific item, please fill out the form below or call 703-631-8810 x12 with your questions.

You will receive an email confirming your order, along with an Invoice/Receipt attached. Please check your spam folder if you don't receive the confirmation email; and if you have not received this email within 12 hours, please contact us as your shipment notification and tracking information is sent to this same email address.

Canadian purchasers: Please note that you, the buyer, are responsible for any VAT, tariff, duty, taxes, handling fees, customs clearance charges, etc. required by your country for importing consumer goods. We do not

collect this beforehand, and can't give you an estimate of the cost, because it varies widely around the world. Please do your research so you're ready to get your package cleared through customs, and have an idea of the additional cost.

INTERNATIONAL SHIPMENTS (other than Canada): We use Worldwide Expedited for our International shipments (after you process your order, your shipment will ship within 7 working days). In the Checkout process you can "expedite" your order by choosing Worldwide Express Saver or Worldwide Express and your order will ship the next business day. Please note that you, the buyer, are responsible for any VAT, tariff, duty, taxes, handling fees, customs clearance charges, etc. required by your country for importing consumer goods. We do not collect this beforehand, and can't give you an estimate of the cost, because it varies widely around the world. Please do your research so you're ready to get your package cleared through customs, and have an idea of the additional cost.

We can ship on your shipping account upon request, contact us at <http://www.envirosapes.com/contactus/> or call (703) 631-8810 x 12.

Each EnviroScape® Model comes with a Users Guide that gives instructions, background, demonstrations and activities you can achieve with your model. *Below are the Contents of each model to give you an idea of each users guide.*

TEMPLE DAILY TELEGRAM

TEMPLE STORM WATER PROGRAM

Girl Scout troop to help spread awareness about pollution

BY SALLY GRACE HOLTGRIEVE
TELEGRAM STAFF WRITER

A local Girl Scout troop will be teaming up with Temple Storm Water Program and the city's Mapping Department to help educate citizens about pollution prevention.

The annual storm drain marking event will take place at 10 a.m. Saturday.

Girl Scout Troop 8226 will be affixing steel buttons that say "No Dumping, Drains to Creek" to 24 storm drain inlets within the Village of Sage Meadows.

"Storm drain markers are a reminder that

storm drains lead to our creeks, lakes and streams," Kara Godineaux, Temple's Stormwater Program specialist, said. "Debris, chemicals, trash, dirt and other pollutants that come in contact with stormwater also enter the storm inlets. These inlets lead to the same waterways that we use for swimming, fishing and ultimately it is where our drinking water originates before treatment."

This is the third year of storm drain marking and Godineaux said she hopes to start having multiple events a year.

"We've got a whole lot of city," she said with a laugh. "If other local groups want

to set up an event and help too, we will work with them to make that happen." Godineaux said the city does not have extreme problems with people dumping in the stormwater drains, but there always is room for improvement.

"It's the same as with any city," she said. "People drop trash and they don't pick up after their pets. A lot of people just have no idea storm water goes straight to creeks and rivers. Our aim is to provide them with that knowledge so they think twice about actions such as dropping paper on the ground." The Boy Scouts have helped mark the

drains previously. This is the first year the Girl Scouts will participate. About 17 fourth- through seventh-graders from Troop 8226 will participate.

"We've been teaching (the Scouts) about recycling and reusing to prepare for this," Junior Troop Leader Kayla Krantz said. "They are working on a Journey badge."

The Girl Scouts have a few more steps before they can receive their badge, though. Krantz said after the stormwater marking event they will complete more community service hours through different projects.

Annual Report

Storm Water Annual Report

An annual report is required under the Texas Pollutant Discharge Elimination System Small Municipal Separate Storm Sewer System General permit (TPDES-MS4). The City of Temple submits an annual report to TCEQ within 90 days of the end of each reporting year. This annual report addresses several required elements of the previous reporting year. A copy of the annual report is mailed to the TCEQ's regional office in Waco, Texas.

History of our program

The City of Temple received its first Phase II Municipal Separate Storm Sewer System (MS4) permit in 2008 from the Environmental Protection Agency (EPA) and the Texas Commission on Environmental Quality (TCEQ). We are currently entering our 2nd permit term under the National Pollutant Discharge Elimination Systems (NPDES; in Texas it is TPDES).

MS4 Permit

TCEQ Texas Pollutant Discharge Elimination System Small MS4 General Permit Authorization #TXR040037

About our program

The City of Temple and the community developed a program to meet state and federal requirements related to stormwater. The objective of the Storm Water Management Program (SWMP) is to reduce pollution that travels into our waterways.

Storm Water Management Plan

What we do

Several departments within the City are instrumental in implementing this plan. The City of Temple staff:

- maintains the storm drainage systems
- inspects the industrial and construction sites
- performs stormwater sampling
- investigates suspicious discharges
- participates in public outreach and education

Good-Housekeeping

Good Housekeeping practices have been established within the City of Temple to maintain compliance with our MS4 Stormwater Permit. These practices include:

- Annual training for City employees
- Education and certification of municipal employees to reduce water quality impacts from fertilizers and pesticides
- Collecting and recycling used motor oil from the fleet maintenance activities
- Street sweeping and street cleaning
- Regular maintenance and cleaning of the stormwater inlets and drainage system helps to reduce the amount of debris, trash and other pollutants in the storm drain system
- Dechlorination equipment is required to remove excess chlorine from wash water that is used to treat new water lines
- Maps and inventory of all of all City-owned facilities and their storm water controls.

Illicit Discharge

What is an illicit discharge?

An illicit discharge is any discharge into a storm drain system that is not composed entirely of stormwater. The exceptions include water from fire fighting activities and discharges from facilities already under an NPDES permit.

Why is protecting storm water from illicit discharges important?

Stormwater flows to waterways without any additional treatment. Illicit discharges often include pathogens, nutrients, surfactants, and various toxic pollutants.

How do I know if it is o.k.?

Below is a list of discharges allowed by our permit:

- water line flushing (excluding discharges of hyper-chlorinated water, unless the water is first de-chlorinated and discharges are not expected to adversely affect aquatic life);
- runoff or return flow from landscape irrigation, lawn irrigation, and other irrigation utilizing potable water, groundwater, or surface water sources
- discharges from potable water sources
- diverted stream flows
- rising ground waters and springs
- uncontaminated ground water infiltration
- uncontaminated pumped ground water
- foundation and footing drains
- air conditioning condensation
- water from crawl space pumps
- individual residential vehicle washing
- flows from wetlands and riparian habitats
- de-chlorinated swimming pool discharges
- street wash water
- discharges or flows from fire fighting activities (fire fighting activities do not include washing of trucks, run-off water from training activities, test water from fire suppression systems, and similar activities)
- other allowable non-storm water discharges listed in 40 CFR ' 122.26(d)(2)(iv)(B)(1)
- non-storm water discharges that are specifically listed in the TPDES Multi Sector General Permit (MSGP) or the TPDES Construction General permit (CGP)
- other similar occasional incidental non-storm water discharges, unless the TCEQ develops permits or regulations addressing these discharges.

If the discharge does not fall into any of the above categories, please contact the Stormwater Management Program, (254) 298-5625.

Reporting illicit discharges

If someone is dumping liquids or trash into a storm drain or if you see an illicit discharge, please contact the Stormwater Management Program Office at (254) 298-5625 or (254) 654-0362.

Reporting illegal dumping

Illegal dumping can also affect our stormwater. Please report any illegal dumping to the City of Temple Code Enforcement Office (254) 298-5670.

Post-Construction

ARTICLE II. POST CONSTRUCTION STORMWATER RUNOFF CONTROL

Subchapter A. General Provisions

Sec. 27-1

The purpose of this ordinance is to establish minimum storm water management requirements and controls to protect and safeguard the general health, safety, and welfare of the public residing in watersheds within the city. This ordinance seeks to meet that purpose through the following objectives:

1. Minimize increases in storm water runoff from any land disturbing activity in order to reduce flooding, siltation, increases in stream temperature, and stream bank erosion and maintain the integrity of stream channels;
2. Minimize increases in nonpoint source pollution caused by storm water runoff from land disturbing activity which would otherwise degrade local water quality;
3. Minimize the total annual volume of surface water runoff which flows from any specific site during and following land disturbing activity to not exceed the pre-land disturbing activity hydrologic regime to the maximum extent practicable; and
4. Reduce storm water runoff rates and volumes, soil erosion and nonpoint source pollution, wherever possible, through storm water management controls and to ensure that these management controls are properly maintained and pose no threat to public safety.

Public Education/ Involvement

Storm Drain Marking

The City of Temple's Storm Water Program hosts an annual Storm Drain Marking Event as part of our Public Education and Involvement program. This event consists of volunteers affixing steel buttons with a "No Dumping, Drains to Creek" message to the storm drain inlets. Anything that enters a storm drain inlet is discharged untreated into our waterways such as creeks, streams, rivers and lakes. Storm water affects both aquatic life and human life.

What can I do to prevent storm water pollution?

- Use fertilizers sparingly and sweep up driveways, sidewalks, and gutters
- Never dump anything down storm drains
- Vegetate bare spots in your yard
- Compost your yard waste
- Use less toxic pesticides and follow labels
- Take your car to the car wash instead of washing it in the driveway
- Check your car for leaks
- Recycle your motor oil
- Have your septic tank system inspected and pumped regularly
- Pick up after your pet: pick up your pet waste and dispose of it in the trash

A little can go a long way.....

Pet waste left on the street or lawn is often washed down the storm drain system. Pet waste can travel for miles in the water.

All stormwater drains to a body of water such as a river, stream, creek, lake or ocean.

The waste from one large dog in one day contains approximately 7.8 billion fecal coliform bacteria.

Bag your pet's waste and trash it to prevent the waste from contaminating our waters.

What is Stormwater?

What is Storm Water?

Rainwater, snow, sleet, or hail that runs off streets, houses, lawns, and other sites. Since it is not able to be absorbed into the ground, it goes into storm drains and drainage ditches. Once the storm water goes into the drains and ditches it travels through the storm water pipes until it reaches a body of water such as a stream, lake, creek, river or ocean.

Why is protecting storm water important?

Storm water is untreated and goes directly into our lakes, rivers, streams, creeks or oceans. Wildlife use these bodies of water to live in and for food and water. They can become sick from pollution that travels with the storm water.

What types of pollution can travel with the storm water?

- Oil, grease, metals and coolants from vehicles
- Fertilizers and pesticides from gardens and homes
- Yard debris (grass clippings, leaves, etc)
- Pet wastes
- Trash: such as drink cans, food wrappers, etc
- Soil from construction sites and other bare ground
- Soaps from car or equipment washing

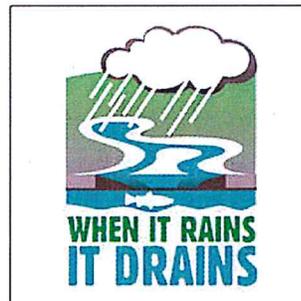

How does this pollution effect the environment?

Oil, grease, coolants, soaps, and pesticides are toxic to not only wildlife but also to our drinking water supply. Pet waste has large amounts of bacteria that can make the water unsafe for recreational activities such as fishing or swimming. Soil can make it difficult for plants to receive sunlight, clogs fish gills, smother fish eggs and carry nutrients that can cause algae blooms.

Stormwater Pollution Prevention

For more information please contact:

City of Temple
 Storm Water Program
 254.298.5625
www.templetx.gov

Please think about your actions at home, work and public places and how they may impact our waterways.

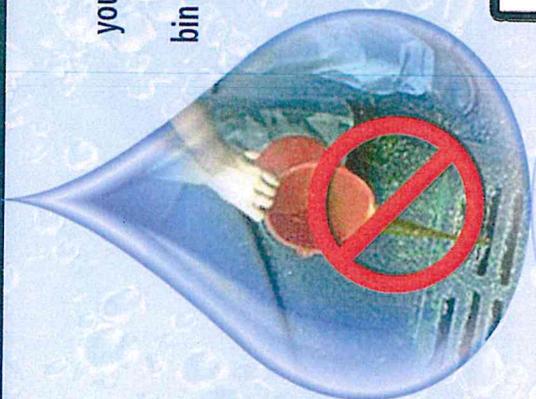

Storm Water is the water that originates during a precipitation event, such as rain or snow, and enters the Storm Drainage System.

Q: Where does the Storm Drainage System discharge?

A: Storm Water always ends up in our waterways which include streams, creeks, rivers, lakes and the ocean.

Pollutants found in Storm Water

-  Oil, grease, metals and coolants from vehicles
-  Fertilizers, pesticides and other chemicals from gardens and homes
-  Bacteria from pet waste and failing septic systems
-  Soil from construction sites and other bare ground
-  Soaps/detergents from car or equipment washing
-  Accidental spills, leaky storage containers, tobacco spit and whatever else ends up on the ground

Compost or place your garden clippings in the green-waste bin instead of pushing it down the drain

Apply any excess paint onto an absorbent material such as an old rag or newspaper. When the paint is dry, then dispose of it with the rest of your household waste

What can you do to protect our local waterways?

Prevent detergent from entering the drain by washing your car on the lawn

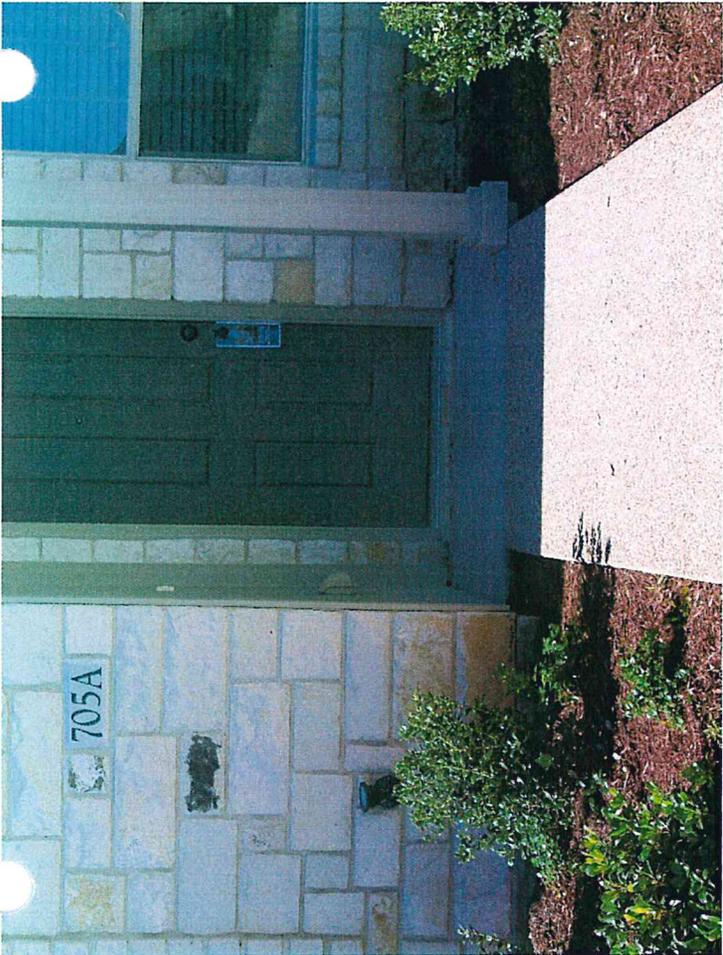

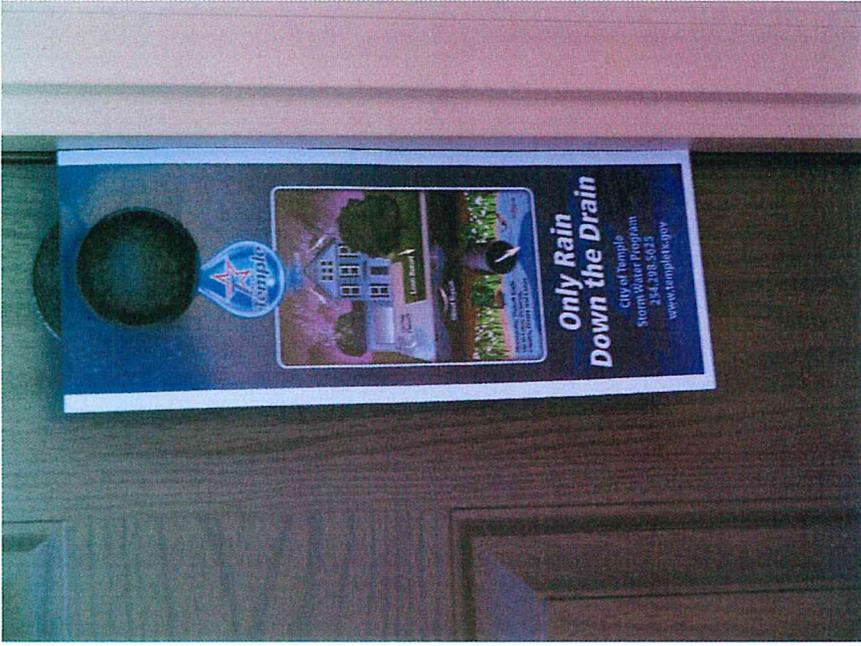

Clean up after your dog on nature strips and within reserves by placing it in designated bins

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	PUBLIC SERVICE ANNOUNCEMENT		PEI-5
Responsible Authority * Stormwater Management Program	BMP DESCRIPTION These are announcements broadcast on local media that address stormwater related topics such as recycling, proper pesticide and fertilizer use, and proper household chemicals disposal. The City of Temple will utilize spots that are available on the City's Time Warner cable access channel. Public service announcements will highlight special events such as the City's annual Household Hazardous Waste Disposal program (ID-6) and Storm Drain Marking events (PEI-6). The PSAs will also promote the City's Public Works Week (PEI-1) and on-going programs such as Used Oil Collection and Recycling (ID-7).		
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Create new stormwater messages(TV) • Broadcast 6 stormwater messages(TV)

Stormwater Runoff

What is it?

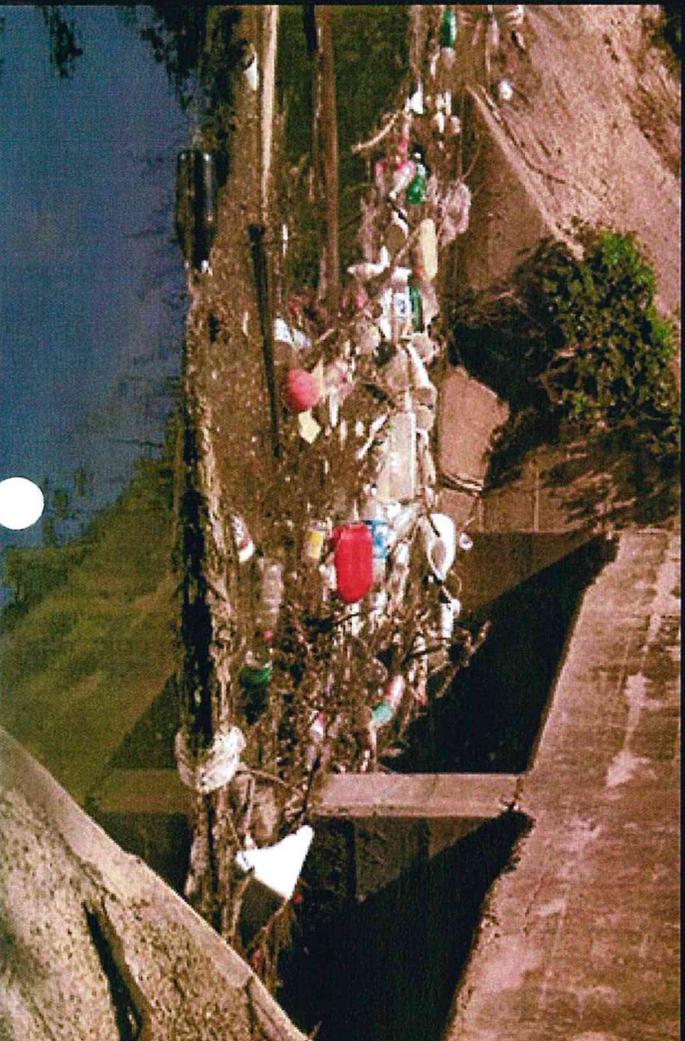

Stormwater runoff occurs when precipitation from rain flows over the ground. Impervious surfaces like driveways, sidewalks and streets prevent stormwater from naturally soaking into the ground.

Stormwater Runoff

Why is it a problem?

Stormwater can pick up debris, chemicals, dirt and other pollutants and flow into a storm sewer system or directly to a lake, stream, river, wetland or coastal water. Anything that enters a storm sewer system is discharged untreated into the waterbodies we use for swimming, fishing and providing drinking water.

What are the effects of Stormwater Pollution?

- Household hazardous wastes like insecticides, pesticides, paint, solvents, used motor oil and other auto fluids can poison aquatic life. Land animals and people can become sick or die from ingesting polluted water.

What are the effects of Stormwater Pollution?

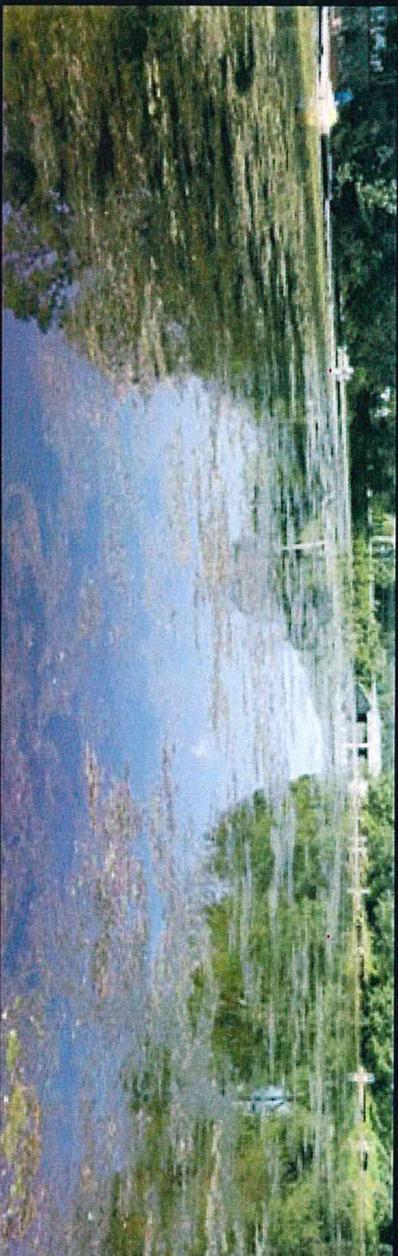

- Bacteria and other pathogens can wash into swimming areas and create health hazards, often making beach closures necessary.

- Debris – plastic bags, six-pack rings, bottles and cigarette butts – washed into waterbodies can choke, suffocate, or disable aquatic life like ducks, fish, turtles and birds.

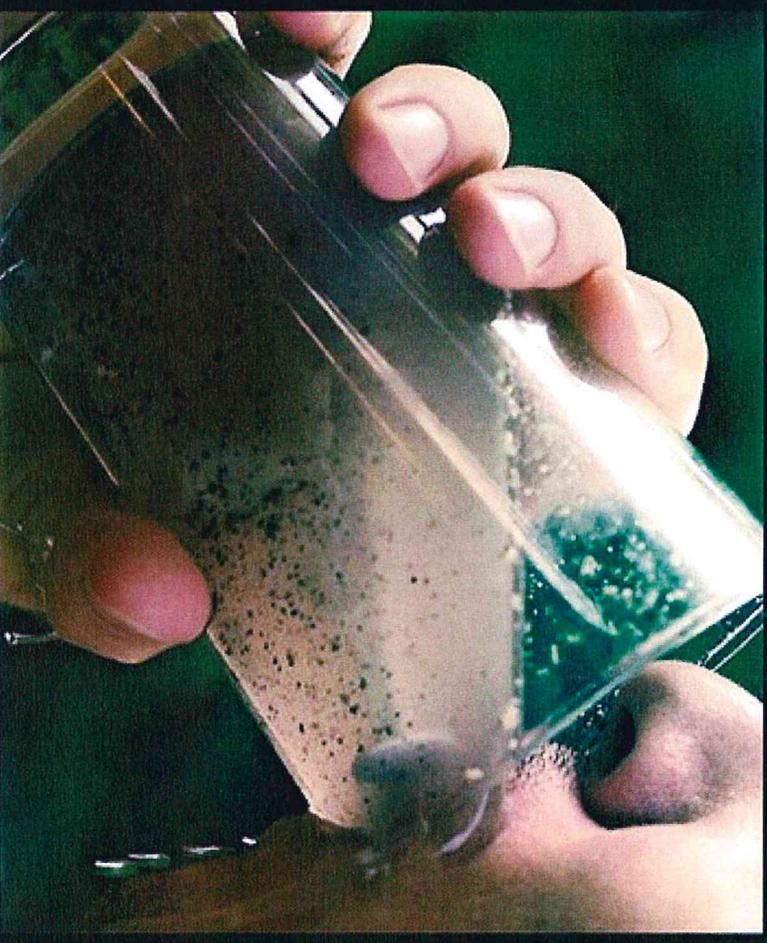

What are the effects of Stormwater Pollution?

- Sediment can cloud the water and make it difficult or impossible for aquatic plants to grow. Sediment can also destroy aquatic habitats.
- Excess nutrients can cause algae blooms. When algae die, they sink to the bottom and decompose in a process that removes oxygen from the water. Fish and other aquatic organisms can't exist in water with low dissolved oxygen levels.

What are the effects of Stormwater Pollution?

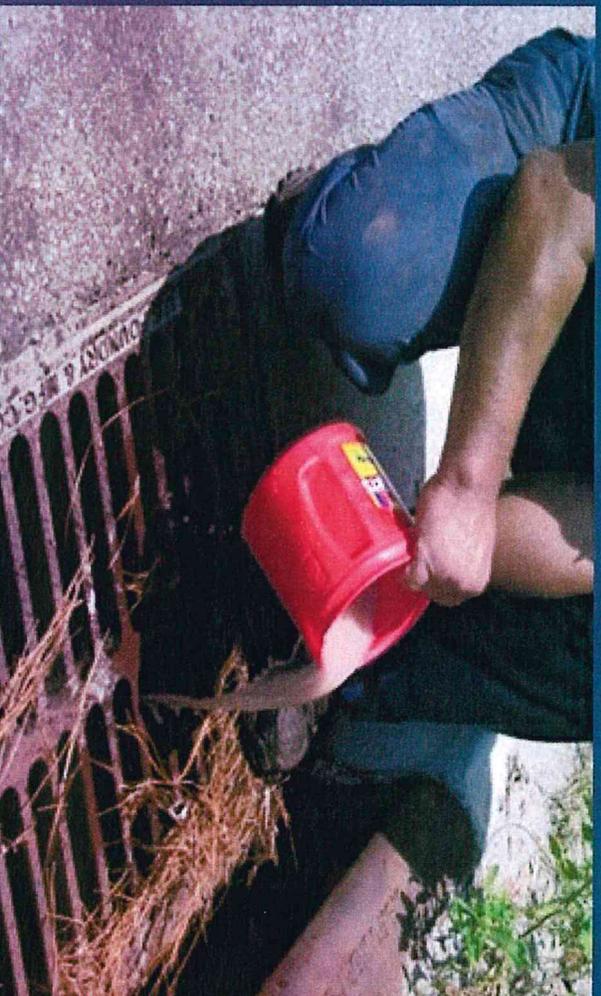

- Polluted stormwater often affects drinking water sources. This, in turn, can affect human health and increase drinking water treatment costs.

Report illegal dumping into a storm drain.
Call (254) 298-5660.

ILLEGAL DUMPING:

The disposal of waste in an unpermitted area.

Disposing of liquid or trash into a storm drain is also illegal dumping and should be reported to the Storm Water program.

(254) 298-5660

ILLEGAL DUMPING:

The disposal of waste in an unpermitted area.

Ways You Can Help Prevent Pollution:

Report illegal
dumping to Code
Enforcement.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	STORM DRAIN MARKING		PEI-6
Responsible Authority *SWMP Mapping	BMP DESCRIPTION This activity consists of volunteers affixing steel buttons with a “Don’t Dump, Drains to Creek” message to storm drain inlets. This marking effort will focus on all areas of the City. Students and involved community citizens can mark inlets through classroom education projects and community involvement projects. Temple will try to utilize as many organizations as possible including Boy Scouts / Girl Scouts and Youth Sports Leagues to mark the inlets. Establishing this BMP in this manner will provide many educational opportunities as well as getting the job done. Developing guidance documents and storm drain inlet maps will standardize the process and also allow the City to direct volunteers to locations where buttons have not been applied. The City’s GIS department will then update the maps in preparation for next year’s event. Events will be publicized through various Public Education BMPs including the Stormwater Web Site (PEI-2) and PSAs (PEI-5).		
	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> At least 1 marking event

FOR IMMEDIATE RELEASE

Storm Drain Marking Event Scheduled for December 5th

(TEMPLE, TX – December 2, 2015) The City of Temple Storm Water Program, along with the City's Mapping Department, will be hosting the annual storm drain marking event on Saturday, December 5, at 10 a.m. in the Village of Sage Meadows in Temple.

"The Storm Drain Marking Program is a hands-on project for volunteers who are interested in educating the citizens of Temple about pollution prevention," states Temple's Stormwater Program Specialist Kara Godineaux. "Girl Scout Troop 8226 will volunteer their time by affixing steel buttons that say "No Dumping, Drains to Creek" to 24 storm drain inlets within the Village of Sage Meadows.

"Storm drain markers are a reminder that storm drains lead to our creeks, lakes and streams." says Godineaux. "Debris, chemicals, trash, dirt and other pollutants that come in contact with stormwater also enter the storm inlets. These inlets lead to the same waterways that we use for swimming, fishing and ultimately it is where our drinking water originates before treatment."

The Stormwater Program office would like to thank the City of Temple Mapping Department for assisting with this event and would also like to recognize the Girl Scout Troop 8226 for their participation in the event.

Any questions regarding the event can be directed to Kara Godineaux at Temple's Stormwater Management Program office, (254)298-5625 or kgodineaux@templetx.gov.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015	YEAR 2
	REFORESTATION PROGRAMS	PEI-7
Responsible Authority * Stormwater Management Program Parks & Leisure Services	BMP DESCRIPTION Reforestation programs strive to preserve and restore forested buffers adjacent to water bodies. These programs utilize volunteers to initiate tree-planting activities to establish forested buffers along stream corridors. Trees and forested buffers reduce runoff through interception and increased infiltration. Forested buffers act to filter pollutants, reduce flood hazards, provide shade and aesthetic benefits, provide wildlife habitat and reduce urban heat index. This BMP will be integrated with existing programs and organizations such as Keep Temple Beautiful (KTB). Temple has earned the designation of Tree City USA and has an annual A Tree For Me tree giveaway. The City maintains a tree nursery and the Parks Department employs an urban forester to investigate violations of the tree ordinance.

PROGRESS DURING CURRENT REPORTING PERIOD The City of Temple successfully planned and sponsored one tree planting event. The Stormwater Management Program partnered with the Parks and Leisure's Department, Central Texas Master Naturalist and Boy Scout Troop #153. Trees were planted at <u>Lion's Park</u> . A total of <u>20</u> trees were planted.

City of Temple Storm Water Tree Planting Event

When: February 14, 2014, 10:00 am

Attendees:

City of Temple Storm Water Management Program, Parks
& Leisure Services and Boy Scout Troop 153.

For More Information Please Contact:

Terri Rodriguez

Storm Water Program Technician

(254)298-5625

trodriguez@templetx.gov

Point of Contact:

Shannon Gowan, Director of Communications 254-298-5600

FOR IMMEDIATE RELEASE

Tree Planting Event Scheduled for February 14th

The City of Temple Storm Water Program will be hosting an annual tree planting event on Saturday, February 14th, at Lion's Park in Temple.

"Reforestation programs are part of our public education & involvement program in the City's Storm Water Management Plan," states Temple's Storm Water Program Tech Terri Rodriguez. "Tree roots help hold the soil in place thus reducing erosion of soil into our waterways.

"Last year, 25 trees were planted in the event at Conner Park on Old Waco Road in Temple. This year, we plan to plant 20 trees at Lion's Park in Temple," continues Rodriguez. "This will help to create a nice shady environment at the park and reduce the community's effective heat index for the citizens of Temple to enjoy the Park even more."

"Storm water runoff is a major cause of pollution in our rivers, lakes, streams, and creeks. Planting trees near these waterways is one way to help with this problem," says Rodriguez.

The Storm Water office would like to thank the Temple Parks and Leisure Services Department for making this event possible and would also like to recognize the local Boy Scouts for their participation in the event.

Any questions regarding the event can be directed to Terri Rodriguez at Temple's Storm Water Management Program office, (254)298-5625 or trodriguez@templetx.gov.

Temple Parks & Recreation 8th Annual Tree Giveaway

(Temple, TX) – Temple Parks & Recreation wants to give you a FREE tree to help beautify your neighborhood! Approximately 250 trees will be given away as part of the *8th Annual Tree for Me Program* taking place on Saturday, October 31st, 2015.

“The Tree for Me program helps us get more trees planted throughout the community at no additional charge to our citizens,” said City of Temple Parks Superintendent, Val Roming. “Besides providing shade and beautifying our community, trees also reduce air pollution, help us save on energy costs, and can even increase property values for homeowners.”

Applications to receive a free tree are available online at TempleTrees.org or citizens may pick up an application in the Parks & Recreation Administration Office located at 2 N. Main Street, Suite 201 in Temple. Applications are accepted on a first come, first served basis and must be submitted by Friday, October 9th, 2015 at 5:00 p.m. All Temple homeowners are eligible to apply as long as they did not receive a tree through the program last year.

If selected for a tree, it is recommended recipients bring a pick-up truck or trailer to transport their new tree. Parks staff will be on-site during the giveaway to help load trees into vehicles.

The trees are approximately 4 years old and six varieties of trees will be given away this year. Varieties include: Chinquapin Oak, Live Oak, Chinese Pistachio, Red Bud, Red Oak and Monterrey Oak trees.

Each of the trees is grown at the City's Tree Farm, which was established as part of a 2005 Texas Forestry Services grant. The Tree Farm allows the Department to purchase young nursery trees at a low cost and nurture them until they are strong enough to be planted in our parks and throughout the community.

Limited quantities and varieties of trees are available for the Tree for Me Program giveaway. Due to the popularity of this program, it is encouraged that homeowners apply early. The application process is on a first-come, first served basis. Pickup for all trees will be on Saturday, October 31st from 8:00 a.m. – 11:00 a.m. Should there be inclement weather, an alternate pickup day will be held on Saturday, November 7th.

For more information about the Tree for Me program or to download an application, please visit TempleTrees.org.

###

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	STORMWATER STAKEHOLDERS COMMITTEE		PEI-8
	BMP DESCRIPTION People from the community that have a vested interest in a municipality's stormwater program are commonly assembled into a stakeholders committee to provide guidance and input to city officials. Stakeholders provide guidance on a particular issue facing the community and provide input during the planning and implementation phase. Stakeholders include citizens, local school groups, community leaders, government representatives, developers, and business owners. The City of Temple assembled a diverse group of stakeholders to assist the City in developing their Stormwater Management Program. The Stormwater Stakeholder Committee will reconvene annually to review the progress toward BMP implementation and suggest changes if certain program elements or BMPs are not functioning as intended.		
Responsible Authority * Engineering	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> Hold 1 stakeholder meeting to review the new SWMP (5 year plan)

2015 Storm Water Stakeholders Committee Meeting Year 1 Annual Report Review

Agenda

- ▶ Highlights of Year One BMP's
- ▶ Year two agenda
- ▶ Questions or comments

Minimum Control Measures

- ▶ Public Education & Involvement
- ▶ Illicit Discharge, Detection & Elimination
- ▶ Construction
- ▶ Post Construction
- ▶ Good Housekeeping

New Requirement by TCEQ

- ▶ Determine whether or not the City is a significant source of impairment to Little River which is an impaired water body by the EPA.
- ▶ After testing water samples where our city limits ends, it is our opinion based on water testing lab results that we are NOT a significant source of the impairment.
- ▶ This information will be submitted to TCEQ in our annual report.

Storm Water Brochure & Door Hanger

Please think about your actions at home, work and in public places and how they may impact our waterways

Storm Water is the water that originates during a precipitation event, such as rain or snow, and enters the Storm Drainage System.

Q: Where does the Storm Drainage System discharge?

A: Storm Water always ends up in our waterways which include streams, creeks, rivers, lakes and the ocean.

Pollutants found in Storm Water

-  Oil, grease, metals and coolants from vehicles
-  Fertilizers, pesticides and other chemicals from gardens and homes
-  Bacteria from pet waste and failing septic systems
-  Soil from construction sites and other bare ground
-  Soaps/detergents from car or equipment washing
-  Accidental spills, leaky storage containers, tobacco spit and whatever else ends up on the ground

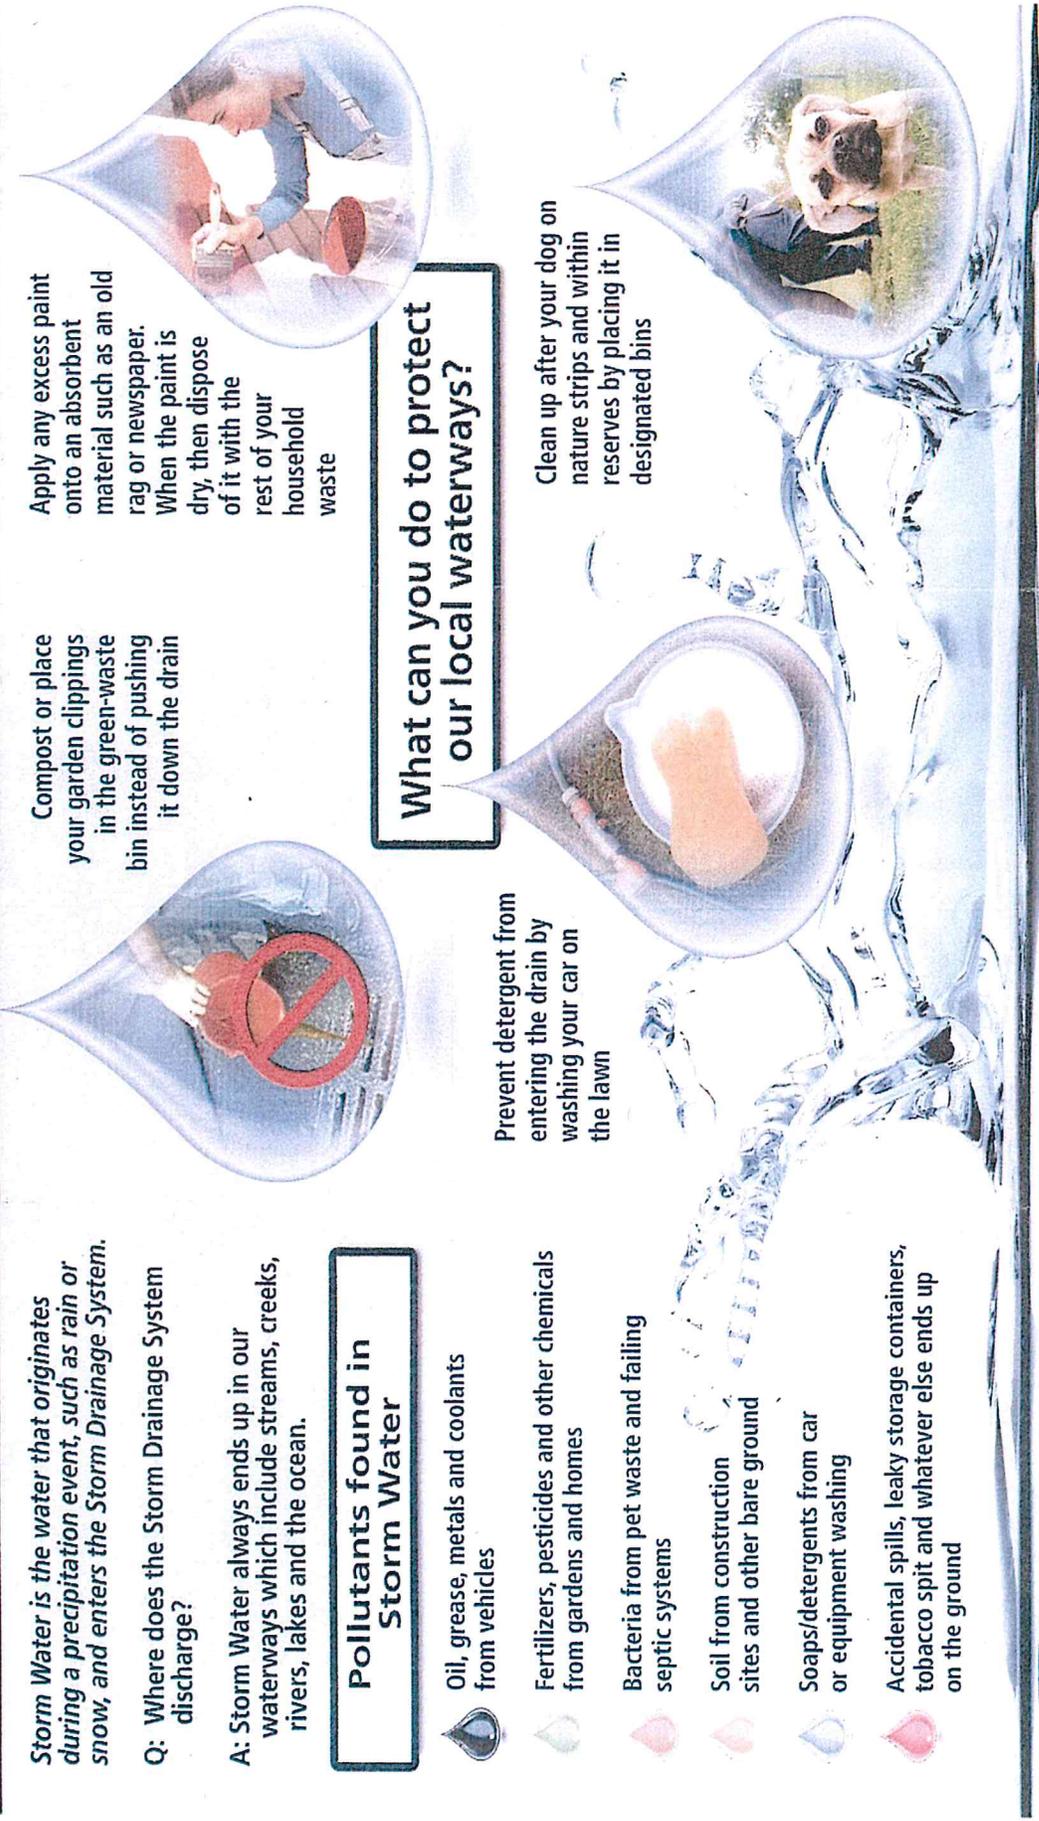

Compost or place your garden clippings in the green-waste bin instead of pushing it down the drain

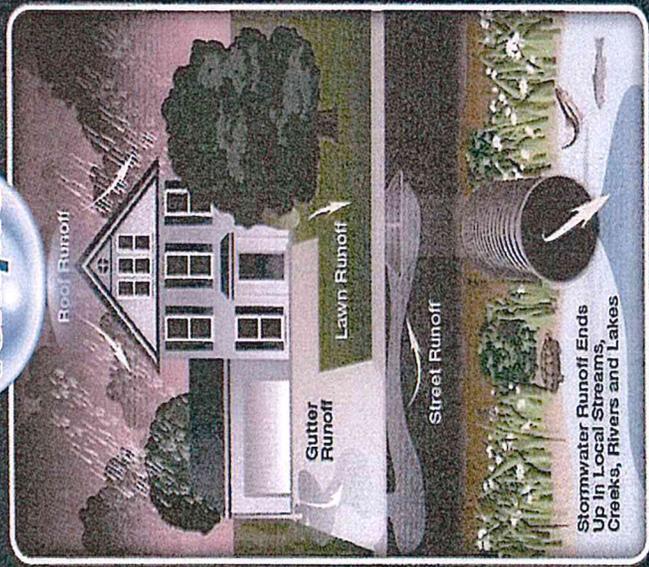

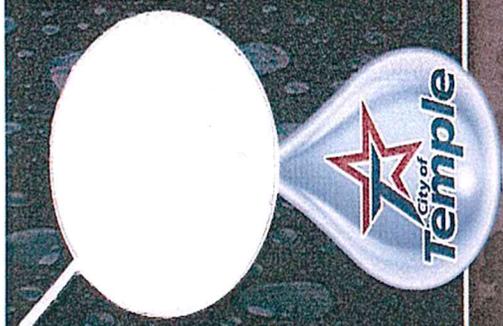

Apply any excess paint onto an absorbent material such as an old rag or newspaper. When the paint is dry, then dispose of it with the rest of your household waste

What can you do to protect our local waterways?

Prevent detergent from entering the drain by washing your car on the lawn

Clean up after your dog on nature strips and within reserves by placing it in designated bins

Only Rain Down the Drain

City of Temple
Storm Water Program
254.298.5625
www.templetx.gov

Did you know that what you do on your property affects our water system?

Storm Water is the water that originates during a precipitation event, such as rain or snow, and enters the Storm Drainage System.

Q: Where does the Storm Drainage System discharge?

A: Storm Water always ends up in our waterways which include streams, creeks, rivers, lakes and the ocean.

How can you help?

- Wash your car on the lawn or at a car wash
- Pick up pet waste
- Never dump anything down a storm drain
- Reduce your use of fertilizers and pesticides

Inlet Marking Event

- ▶ Local baseball team
- ▶ 31 inlets marked

Annual Tree Planting Event

City of Temple Storm Water Tree Planting Event

When: January 31, 2014, 10:00 am

Where: Lion's Park at 4620 Lion's Park Rd in Temple

Attendees:

City of Temple Storm Water Management Program, Parks
& Leisure Services and Boy Scout Troop 153.

For More Information Please Contact:

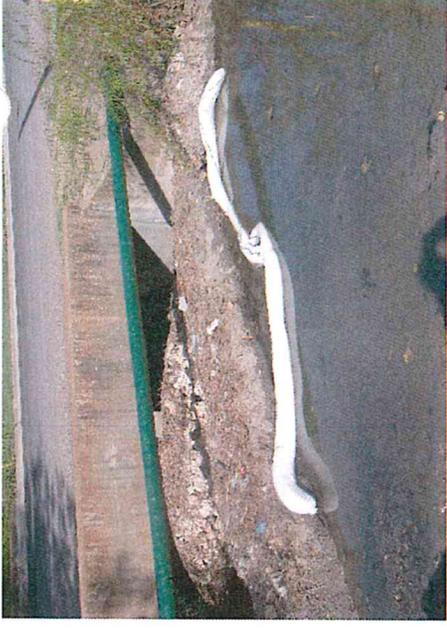

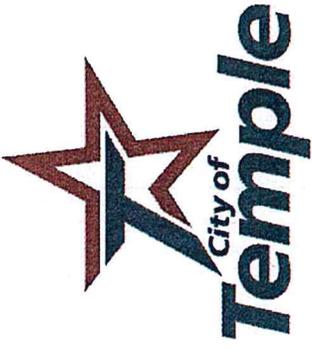

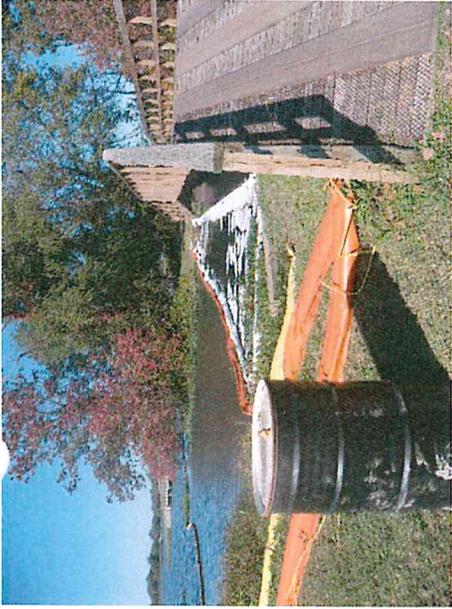

Terri Rodriguez

Storm Water Program Technician

(254)298-5625

trodriguez@templetx.gov

Responding to Illicit Discharges and Spills

(Procedures)

1. Document the report of every incident.
2. Investigate every report of an illicit discharge or spill.
3. Take pictures of the discharge or spill on site.
4. Conduct water testing if necessary to determine what the discharge may be.
5. Use maps and check surrounding areas to help determine the source of the discharge or spill.
6. Notify the source to take proper actions on eliminating the illicit discharge.
7. Report any illegal activity or negative response to eliminating the problem to the City's Legal Department.
8. Document all actions taken in response to an illicit discharge or spill.

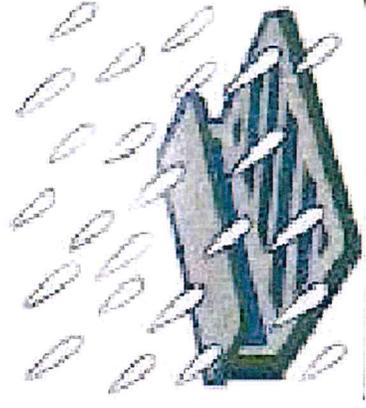

Construction Inspection

- ▶ All active construction sites & inspections are documented & submitted to TCEQ.
- ▶ A SWPPP, Construction Site Notice (small or large) and an NOI must be submitted before construction begins for any site that is one acre or more of disturbed land.
- ▶ If you receive an inspection report from the Storm Water Program Tech, please make the necessary improvements to the BMP's ASAP to prevent any further action.

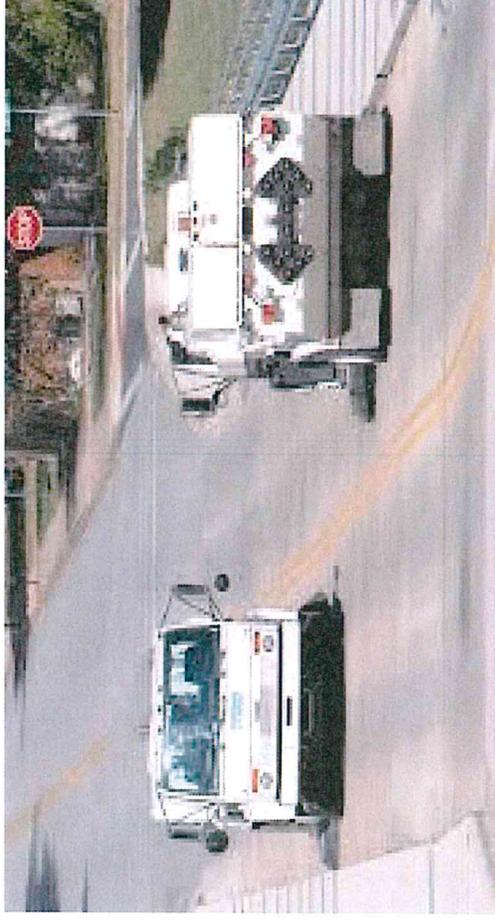

Storm Water Management Plan (SWMP)

- ▶ The purpose of a SWMP is to prevent storm water pollution even after construction is completed.
- ▶ A SWMP is required for all land disturbing activities which disturb one (1) acre or more of land within the city limits.
- ▶ This ordinance was accepted in July of 2012.
Any land that was platted before then is excluded from the SWMP submittal.

Roadway Cleaning

- ▶ The City of Temple Street Division cleaned 4,667.25 lane miles this permit year.
- ▶ TCEQ requires a minimum of 2,400 lane miles cleaned each year.

Good Housekeeping

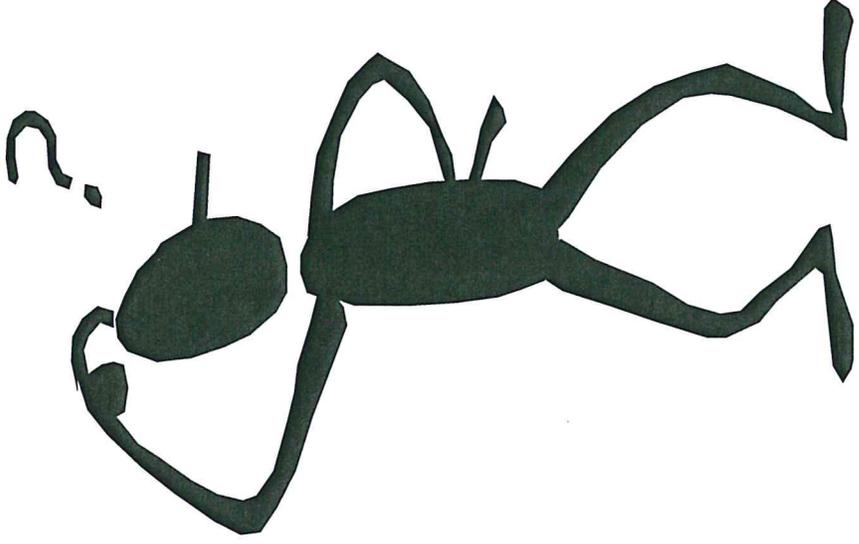

Year 2 Agenda

- ▶ All of our current BMP's will be maintained.
- ▶ Continue to comply with the Storm Water MS4 permit requirements & raise awareness of storm water pollution prevention.
- ▶ This permit term is for 5 years, expires December 12, 2018.

Questions or Comments?

FOR IMMEDIATE RELEASE

Sanitary Sewer Inspection-Bird Creek

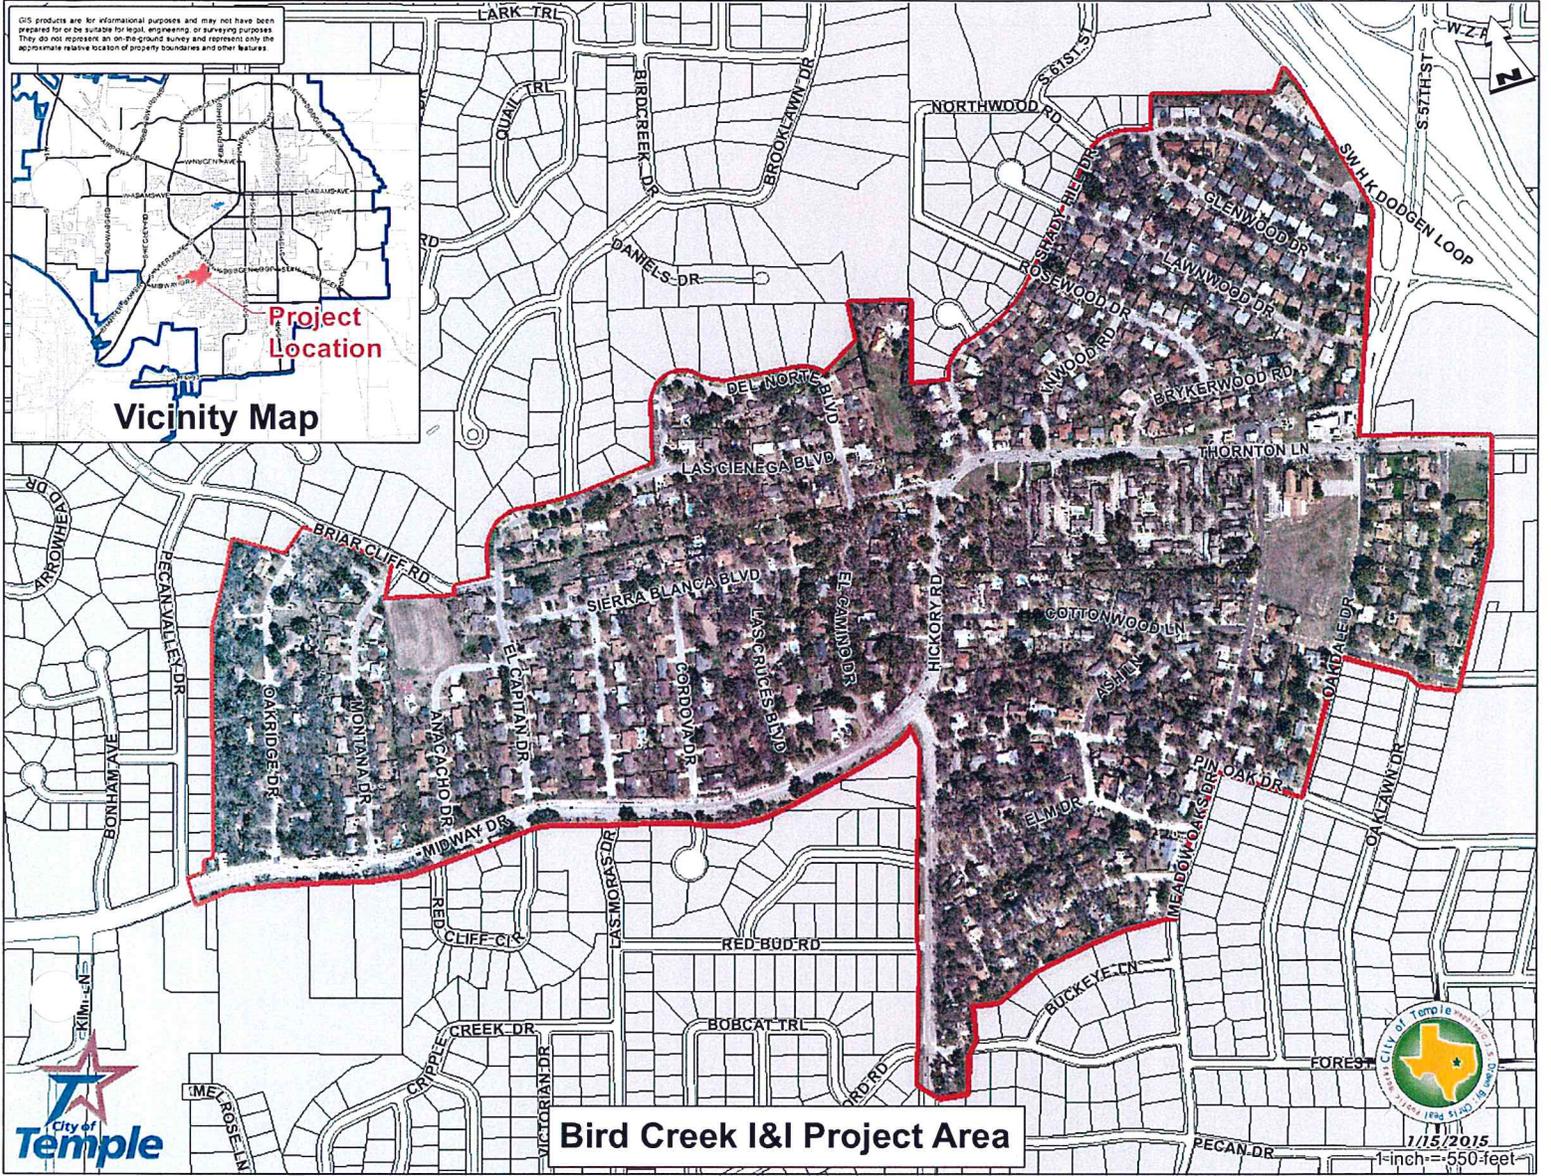

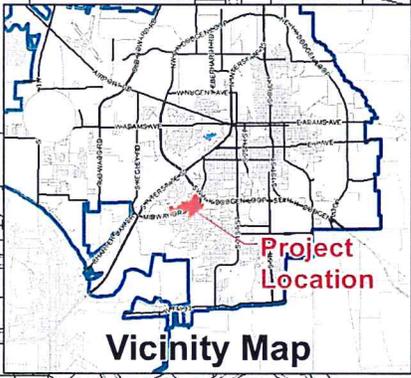

TEMPLE, TX – (February 23, 2015) The City of Temple will be performing smoke testing on a portion of the City sewer system in the Bird Creek Sewer Basin beginning February 26th and continuing through the month of March. The entire testing area is shown on the attached map. The City has contracted with Sewer Services of Texas to perform this work and crews will need to gain access to the sewer manholes using existing utility easements (which in most instances crosses over or through residential yards).

Smoke testing is an efficient manner of locating and identifying locations where ground water is entering the City's sewer system, known as inflow and infiltration. During rain events, this extra water can significantly increase water treated at two City wastewater treatment plants; increasing costs to utility system customers.

During the smoke testing process, smoke may be seen coming from manholes, storm drains, and/or the ground surface. Smoke from this testing should not enter homes or businesses. However, if this does occur, there is no cause for concern, unless the origin of the smoke is unknown, at which time emergency services should be contacted. City Fire and Police Departments will be notified of this process and they will be available to help address any concerns that may arise.

###

GIS products are for informational purposes and may not have been prepared for or be suitable for legal, engineering, or surveying purposes. They do not represent an on-the-ground survey and represent only the approximate relative location of property boundaries and other features.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	DRY WEATHER SCREENING		ID-2
	BMP DESCRIPTION The City of Temple staff will perform dry weather screening. Staff will walk creeks during dry weather periods to make visual inspections and perform chemical analysis to monitor for the presence of certain chemicals or pollutants. If the chemical analysis indicates a concentration of pollutant that is above the allowable threshold limits, further investigation will be required. The City documents the location of the field tests, allowing them to be related to locations on the GIS storm drain system map for future reference and to document precise locations if environmental concerns are identified.		
Responsible Authority * SWMP			
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Walk accessible reaches/perform test for all creeks within city limits • Maintain tracking system/verify GIS map • Continue Dry Weather Screening and Impairment Sampling Events 		
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE None		
PROGRESS DURING CURRENT REPORTING PERIOD Additional sampling points were added to monitor potential pollutants entering the City limits, within the City limits and discharging outside the City limits. The City of Temple staff performed dry weather screening along all creeks within the City limits. If there was a discharge during the sampling event, samples were taken and sent to a laboratory for analysis. Additional microbiological screening (impairment sampling) was performed to monitor the levels of microbiological contaminants leaving the City limits to impaired bodies of water downstream. The Williamson branch, Little Elm Creek, Knob Creek, and Boggy Creek connect to the Little River (Segment 1213). Bird Creek, Friar's Creek, and Pepper Creek connect to the Leon River (Segment 1219).			
Implementation Activity	Measurable Goal	Completion Date

Project: Water Quality Assessment

Qualifying Statement

Results are an assessment of the sample aliquot delivered to the laboratory and are reported "As Received" on a wet basis unless otherwise indicated. All analyses were performed by this facility. Results generated by a subcontract laboratory will be qualified as such and the original report will be made available to the client upon request. The subcontract laboratory will be NELAP certified for the requested analysis if required by the client for the specified project. Waco Regional Water Quality Laboratory is a municipal laboratory and maintains NELAP certification through the Texas Commission on Environmental Quality, a recognized accreditation body under NELAC. Waco Regional Water Quality Laboratory also maintains recognition through the Texas Commission on Environmental Quality's Laboratory Approval Program for Public Water System drinking water analyses to include turbidity, pH, temperature, total organic carbon, UV 254, alkalinity, free and total chlorine, and phosphate. The Texas Commission on Environmental Quality does not offer NELAP certification for these drinking water parameters at this time. Test results are generated through implementation of a NELAC approved laboratory quality system and meet all requirements of that system unless otherwise noted in the qualifier section.

The following is a key to notations found in this report:

CONTAINER

P = Plastic	G = Glass	T = Teflon Cap
A = Amber	S = Sterile	
VOA = Volatile Organic Analysis (40mL-T)	NS = Not Standard for Analysis	

SAMPLE TYPE

G = Grab	C = Composite
----------	---------------

REPORTING UNITS

mg/L = milligrams per Liter	S.U. = Standard Units	°C = degrees Celsius
ug/L = micrograms per Liter	uS = microSiemens	cm-1 = per 1 centimeter path width
mpn = most probable number	L = Liter	mL = milliliter

QUALITY CONTROL

LRB = Laboratory Reagent Blank	LOQ = Limit of Quantification	LD = Laboratory Duplicate
LCS = Laboratory Control Standard	LFB = Laboratory Fortified Blank	QCS = Quality Control Standard
RPD = Relative Percent Difference	MS = Matrix Spike	MSD = Matrix Spike Duplicate
PQL = Practical Quantification Limit		

NA = Not Applicable	ND = Not Detected	NR = Not Recorded	NC = Not able to Calculate
---------------------	-------------------	-------------------	----------------------------

Final Report Cover Sheet

Report Identification Number: **WS9394**

Report Date: September 24, 2015

Project: Water Quality Assessment

Qualifying Statement

Results are an assessment of the sample aliquot delivered to the laboratory and are reported "As Received" on a wet basis unless otherwise indicated. All analyses were performed by this facility. Results generated by a subcontract laboratory will be qualified as such and the original report will be made available to the client upon request. The subcontract laboratory will be NELAP certified for the requested analysis if required by the client for the specified project. Waco Regional Water Quality Laboratory is a municipal laboratory and maintains NELAP certification through the Texas Commission on Environmental Quality, a recognized accreditation body under NELAC. Waco Regional Water Quality Laboratory also maintains recognition through the Texas Commission on Environmental Quality's Laboratory Approval Program for Public Water System drinking water analyses to include turbidity, pH, temperature, total organic carbon, UV 254, alkalinity, free and total chlorine, and phosphate. The Texas Commission on Environmental Quality does not offer NELAP certification for these drinking water parameters at this time. Test results are generated through implementation of a NELAC approved laboratory quality system and meet all requirements of that system unless otherwise noted in the qualifier section.

The following is a key to notations found in this report:

CONTAINER

P = Plastic	G = Glass	T = Teflon Cap
A = Amber	S = Sterile	
VOA = Volatile Organic Analysis (40mL-T)	NS = Not Standard for Analysis	

SAMPLE TYPE

G = Grab C = Composite

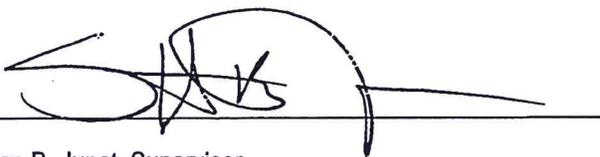

REPORTING UNITS

mg/L = milligrams per Liter	S.U. = Standard Units	°C = degrees Celsius
ug/L = micrograms per Liter	uS = microSiemens	cm-1 = per 1 centimeter path width
mpn = most probable number	L = Liter	mL = milliliter

QUALITY CONTROL

LRB = Laboratory Reagent Blank	LOQ = Limit of Quantification	LD = Laboratory Duplicate
LCS = Laboratory Control Standard	LFB = Laboratory Fortified Blank	QCS = Quality Control Standard
RPD = Relative Percent Difference	MS = Matrix Spike	MSD = Matrix Spike Duplicate
PQL = Practical Quantification Limit		

NA = Not Applicable ND = Not Detected NR = Not Recorded NC = Not able to Calculate

Final Report Cover Sheet

Report Identification Number: **WS9403**

Report Date: October 7, 2015

Project: Water Quality Assessment

Qualifying Statement

Results are an assessment of the sample aliquot delivered to the laboratory and are reported "As Received" on a wet basis unless otherwise indicated. All analyses were performed by this facility. Results generated by a subcontract laboratory will be qualified as such and the original report will be made available to the client upon request. The subcontract laboratory will be NELAP certified for the requested analysis if required by the client for the specified project. Waco Regional Water Quality Laboratory is a municipal laboratory and maintains NELAP certification through the Texas Commission on Environmental Quality, a recognized accreditation body under NELAC. Waco Regional Water Quality Laboratory also maintains recognition through the Texas Commission on Environmental Quality's Laboratory Approval Program for Public Water System drinking water analyses to include turbidity, pH, temperature, total organic carbon, UV 254, alkalinity, free and total chlorine, and phosphate. The Texas Commission on Environmental Quality does not offer NELAP certification for these drinking water parameters at this time. Test results are generated through implementation of a NELAC approved laboratory quality system and meet all requirements of that system unless otherwise noted in the qualifier section.

The following is a key to notations found in this report:

CONTAINER

P = Plastic

A = Amber

VOA = Volatile Organic Analysis (40mL-T)

G = Glass

S = Sterile

NS = Not Standard for Analysis

T = Teflon Cap

SAMPLE TYPE

G = Grab

C = Composite

REPORTING UNITS

mg/L = milligrams per Liter

ug/L = micrograms per Liter

mpn = most probable number

S.U. = Standard Units

uS = microSiemens

L = Liter

°C = degrees Celsius

cm-1 = per 1 centimeter path width

mL = milliliter

QUALITY CONTROL

LRB = Laboratory Reagent Blank

LCS = Laboratory Control Standard

RPD = Relative Percent Difference

PQL = Practical Quantification Limit

LOQ = Limit of Quantification

LFB = Laboratory Fortified Blank

MS = Matrix Spike

LD = Laboratory Duplicate

QCS = Quality Control Standard

MSD = Matrix Spike Duplicate

NA = Not Applicable

ND = Not Detected

NR = Not Recorded

NC = Not able to Calculate

Stephen B. Junot, Supervisor

Final Report Cover Sheet

Report Identification Number: **WS9363-AMENDED**

Report Date: September 18, 2015

Project: Water Quality Assessment

Qualifying Statement

Results are an assessment of the sample aliquot delivered to the laboratory and are reported "As Received" on a wet basis unless otherwise indicated. All analyses were performed by this facility. Results generated by a subcontract laboratory will be qualified as such and the original report will be made available to the client upon request. The subcontract laboratory will be NELAP certified for the requested analysis if required by the client for the specified project. Waco Regional Water Quality Laboratory is a municipal laboratory and maintains NELAP certification through the Texas Commission on Environmental Quality, a recognized accreditation body under NELAC. Waco Regional Water Quality Laboratory also maintains recognition through the Texas Commission on Environmental Quality's Laboratory Approval Program for Public Water System drinking water analyses to include turbidity, pH, temperature, total organic carbon, UV 254, alkalinity, free and total chlorine, and phosphate. The Texas Commission on Environmental Quality does not offer NELAP certification for these drinking water parameters at this time. Test results are generated through implementation of a NELAC approved laboratory quality system and meet all requirements of that system unless otherwise noted in the qualifier section.

The following is a key to notations found in this report:

CONTAINER

P = Plastic

A = Amber

VOA = Volatile Organic Analysis (40mL-T)

G = Glass

S = Sterile

NS = Not Standard for Analysis

T = Teflon Cap

SAMPLE TYPE

G = Grab

C = Composite

REPORTING UNITS

mg/L = milligrams per Liter

ug/L = micrograms per Liter

mpn = most probable number

S.U. = Standard Units

uS = microSiemens

L = Liter

°C = degrees Celsius

cm-1 = per 1 centimeter path width

mL = milliliter

QUALITY CONTROL

LRB = Laboratory Reagent Blank

LCS = Laboratory Control Standard

RPD = Relative Percent Difference

PQL = Practical Quantification Limit

LOQ = Limit of Quantification

LFB = Laboratory Fortified Blank

MS = Matrix Spike

LD = Laboratory Duplicate

QCS = Quality Control Standard

MSD = Matrix Spike Duplicate

NA = Not Applicable

ND = Not Detected

NR = Not Recorded

NC = Not able to Calculate

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	ILLCIT DISCHARGE INVESTIGATIONS		ID-3
Responsible Authority * SWMP	BMP DESCRIPTION Investigations will utilize appropriate detection methods such as fluorescent dye tests, smoke tests or remote TV camera inspection depending on the nature of the illicit discharge and the potential source. The City may utilize GPS equipment to document the location of the field tests, allowing them to be related to locations on the GIS storm drain system map for future reference and to document precise locations if environmental concerns are identified.		
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____

Responding to Illicit Discharges and Spills

(Procedure)

1. When an incident is reported, the information is documented on Form #SW08.
2. The incident of an illicit discharge or spill is investigated to determine the environmental impacts.
3. The information must include pictures of the discharge or spill on site.
4. Water Quality testing maybe conducted to determine the type of discharge.
5. Maps are used to check the surrounding areas to help determine the source of the discharge or spill. The maps may also be used to determine which bodies of water may be or have been effected.
6. Once the source is determined, notify the source to take proper actions on eliminating the illicit discharge.
7. There may be instances where a source cannot be determined. This information is recorded on Form #SW08 after a thorough investigation has been conducted.
8. Instances of illegal activity or negligence to correct the problem are reported to the Engineering Director and Deputy Director to determine the next step of action.
9. The Engineering Director and Deputy Director will determine if the illegal activity or negligence to correct the problem will need to be discussed further with the City's Legal Department.

BELL COUNTY C

Affidavit detail infant injuries

BY DEBORAH MCKEON
TELEGRAM STAFF WRITER

An arrest affidavit detailing injuries seen by medical examiners on the July 26 death of 11-month-old Hannah Anuhea-Ros Bell County infant who died from blunt force trauma and was also sexually abused, according to an autopsy report, Jeffrey Curtis Johnson Rogers was arrested at his home on Knob Creek Road in Bell County and charged with aggravated assault on a first-degree family member.

ODIERNO

Odierno was stationed to Fort Hood three times during his 39-year career, including as the III Corps and Fort Hood commander from 2006 to 2008.

Lt. Col. Joe Buccino, an Army spokesman at the Pentagon, said Odierno is retiring to Pinchurst, N.C., near Fort Bragg, and the general has not yet made a decision on what he will do following his Army career.

Retired Lt. Gen. Paul "Butch" Funk, a former III Corps and Fort Hood commander living near Gatesville, described Odierno as a "selfless" commander.

"He cares about his people, but he's very tough-minded and smart," Funk said. "He's a terrific soldier, and he and his wife both have done a great job for our Army."

part in various community activities, especially involving children, during the couple's years at Fort Hood.

"He and his family have given and given and given," said retired Lt. Gen. Pete Taylor, adding the Odiernos have a son who was wounded in Iraq.

"In my view, the country and Fort Hood and this community owes Odierno — he and his wife — a great debt of gratitude for the service they have given," Taylor said.

Former Killeen Mayor Tim Hancock was the city's mayor at the same time Odierno was in command of Fort Hood.

"He was a super commander" who worked well with and supported the Killeen area community, said Hancock, adding he and Odierno signed an initial letter of support to build the National Mounted Warfare Museum near Fort Hood's main

At about 2:25 p.m. Thursday a call was received about a large amount of diesel fuel spilled at the intersection of East Adams Avenue and North Main Street after a truck driver ran over a curb and damaged the truck's right saddle tank, Temple Fire & Rescue spokesman Thomas Pechal said. Fuel was leaking heavily when firefighters arrived, and it was estimated that about 40 gallons spilled before firefighters arrived. The saddle tank contains about 150 gallons, Pechal said. Firefighters put out several catch tanks to keep the fuel out of storm drains and any possible water supplies and called in the Temple Fire & Rescue hazardous materials team, Pechal said. The team removed diesel from the portable tanks and an environmental contractor was on the way to remove the remaining residue on the street. Main Street had to be closed until about 6 p.m. Thursday, Pechal said. The spill was contained to one block of North Main Street. Responding for traffic control in the area were Temple Police Department units.

Incident occurred on 10/15/15 around 3:30 pm

KCEN TV

Yesterday at 3:59 PM · Edited ·

ALERT: Huge tire fire on Shallowford West Road, near Temple Towing. Black smoke can be seen from I-35. Crews are responding, the fire shouldn't spread.

Be careful on I-35 in that area, smoke is slowing down traffic.

Observation of area on 10/16/15

Temple cleaning up 790,000 gallons of overflowed wastewater

BY ERIC E. GARCIA, TELEGRAM STAFF | Posted 17 hours ago

Author
TDT Eric Garcia

City workers were cleaning up Monday after 790,000 gallons of wastewater overflowed in Temple from heavy rainfall last week.

Temple officials said overflows occurred at four locations, the most significant at Lions Park, 4320 Lions Park Road, where 400,000 gallons spilled.

The Hickory Life Station, 4611 Chestnut Road, had an overflow of 200,000 gallons, and Friar's Creek Lift Station, 2420 W. FM 93, had a spill of 150,000 gallons. The 30th Street Lift Station had an overflow of 40,000 gallons.

City officials said the wastewater overflows did not affect Temple's drinking water supply. They urged residents be cautious in and around the affected areas, including drainage ditches and small streams.

Temple Public Works Director Nicole Torralva said city crews were performing onsite cleanup and disinfection of the areas where wastewater spilled.

"With the rain event, we got a lot of water in our wastewater system and it reached maximum capacity," Torralva said.

Last week, a similar wastewater overflow from Killeen discharged into two waterways, including Nolan Creek, which runs through Harker Heights, Nolanville and Belton.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	REDUCE ILLEGAL DUMPING		ID-4
	BMP DESCRIPTION A plan to detect and address illegal dumping is a required component of illicit discharge detection and elimination, mandated under TPDES Phase II. Illegal dumping consists of disposal of waste in undesignated areas or pouring of liquid wastes or disposal of trash down storm drains. The most effective method of reducing illegal dumping is to implement an aggressive public education program. The reduction and elimination of illegal dumping in Temple will depend on the implementation of a combination of enforcement and public education BMPs, which will inform citizens of the environmental concerns and legal implications of illegal dumping. Several of the public education BMPs including the Stormwater Web Site (PEI-2), PSAs (PEI-5), and Brochures (PEI-3) will be used to educate the public about illegal dumping.

City of Temple to host Secure Shred Event

(TEMPLE, TX – May 14, 2015) – The City of Temple, in cooperation with Kwik Kopy and RW Lone Star Security, will be hosting a Secure Shred event on Saturday, May 23rd from 9 a.m. – 11 a.m. The event will be held at Holy Trinity High School located at 6608 W Adams Ave. and area residents are invited to participate.

You may bring up to five (5) bankers boxes of documents to be shredded. Businesses and homeowners are encouraged to take part in the shredding event.

“This is an opportunity for residents and business owners to dispose of the sensitive documents securely,” states Solid Waste Services Director Lisa Sebek. RW Lone Star Security destruction procedures comply with local and federal regulations. Additionally, they are a certified member of the National Association of Information Destruction (NAID), and are FACTA and HIPAA compliant. RW Lone Star Security is able to shred the documents onsite, utilizing their secure mobile shredding trucks. This allows residents to view the destruction of their documents.

“An estimated 21 million tons of paper were found in landfills last year,” said Sebek. “While this number has been decreasing over the years, by participating in a secure shred event, even more can be recycled each year.” The City of Temple along with Kwik Kopy and RW Lone Star Security appreciate the opportunity to host this event for our residents and surrounding communities.

For more information or questions, you may contact the City of Temple Solid Waste Services at (254) 298-5725 or curbsiderecycling@templetx.gov.

City of Temple to host Secure Shred Event for America Recycles Day

TEMPLE, TX – November 5, 2015 –The City of Temple, in cooperation with Kwik Kopy and RW Lone Star Security, will be hosting a Secure Shred event for America Recycles Day on Saturday, November 14th from 9:00 a.m. – 12:00 p.m. The event will be held at the Kwik Kopy located at 4311 S. 31st Street and area residents are invited to participate.

You may bring up to five (5) bankers boxes of documents to be shredded. Businesses are encouraged to take part in the shredding as well as home owners. This upcoming event is an opportunity for residents and business owners to dispose of the sensitive documents securely. Also available will be the opportunity to have your electronics such as hard drives securely shredded. RW Lone Star Security destruction procedures comply with local and federal regulations. Additionally, they are a certified member of the National Association of Information Destruction (NAID), and are FACTA and HIPAA compliant. RW Lone Star Security is able to shred the documents onsite, utilizing their secure mobile shredding trucks. This allows residents to view the destruction of their documents.

An initiative of Keep America Beautiful (KAB), America Recycles Day is the only nationally-recognized day dedicated to promoting and celebrating recycling in the U.S. The City of Temple along with Kwik Kopy and RW Lone Star Security appreciate the opportunity to host this event for our residents and surrounding communities.

For more information or questions, you may contact the City of Temple Solid Waste Services at (254) 298-5725 or curbsiderecycling@templetx.gov.

Illicit Discharge

What is an illicit discharge?

An illicit discharge is any discharge into a storm drain system that is not composed entirely of stormwater. The exceptions include water from fire fighting activities and discharges from facilities already under an NPDES permit.

Why is protecting storm water from illicit discharges important?

Stormwater flows to waterways without any additional treatment. Illicit discharges often include pathogens, nutrients, surfactants, and various toxic pollutants.

How do I know if it is o.k.?

Below is a list of discharges allowed by our permit:

- water line flushing (excluding discharges of hyper-chlorinated water, unless the water is first de-chlorinated and discharges are not expected to adversely affect aquatic life);
- runoff or return flow from landscape irrigation, lawn irrigation, and other irrigation utilizing potable water, groundwater, or surface water sources
- discharges from potable water sources
- diverted stream flows
- rising ground waters and springs
- uncontaminated ground water infiltration
- uncontaminated pumped ground water
- foundation and footing drains
- air conditioning condensation
- water from crawl space pumps
- individual residential vehicle washing
- flows from wetlands and riparian habitats
- de-chlorinated swimming pool discharges
- street wash water
- discharges or flows from fire fighting activities (fire fighting activities do not include washing of trucks, run-off water from training activities, test water from fire suppression systems, and similar activities)
- other allowable non-storm water discharges listed in 40 CFR ' 122.26(d)(2)(iv)(B)(1)
- non-storm water discharges that are specifically listed in the TPDES Multi Sector General Permit (MSGP) or the TPDES Construction General permit (CGP)
- other similar occasional incidental non-storm water discharges, unless the TCEQ develops permits or regulations addressing these discharges.

If the discharge does not fall into any of the above categories, please contact the Stormwater Management Program, (254) 298-5625.

Reporting illicit discharges

If someone is dumping liquids or trash into a storm drain or if you see an illicit discharge, please contact the Stormwater Management Program Office at (254) 298-5625 or (254) 654-0362.

Reporting illegal dumping

Illegal dumping can also affect our stormwater. Please report any illegal dumping to the City of Temple Code Enforcement Office (254) 298-5670.

	HOUSEHOLD HAZARDOUS WASTE DISPOSAL	ID-6
	BMP DESCRIPTION The City of Temple currently participates in TCEQ's annual household hazardous waste collection days for the proper disposal of items such as paints, pesticides, fertilizers and other household chemicals. Temple will continue to sponsor annual events. The first line of defense against improper disposal of HHW is through public education. Many residents are simply unaware of the hazards associated with these products and methods for proper disposal. Public education and outreach materials will inform the public about proper storage, handling, and disposal of hazardous chemicals. The HHW collection days will be promoted through several of the public education BMPs including the City's Website (PEI-2), PSAs (PEI-5) and newspaper notices.	
Responsible Authority *Solid Waste	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Continue to host Annual Collection Day • Advertise in Web page and PSA • Document quantity of material collected 	
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date	PROPOSED CHANGE None	
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROGRESS DURING CURRENT REPORTING PERIOD The City of Temple hosted a Household hazardous waste day on October 3, 2015. This event was publicized on the City's website and an announcement was placed in the Temple Daily Telegram. On April 8, 2015, the City of Temple began a new program called "team up to clean up". The program features the new toolbox, an enclosed trailer equipped with a variety of tools and supplies essential for clean-up events.

FOR IMMEDIATE RELEASE

Ribbon Cutting Ceremony for New Temple Toolbox

(TEMPLE, TX – April 8, 2015) The City of Temple will host a brief ceremony to introduce the City's new **team up to clean up!** program on Thursday, April 9, 2015, at 9:00 a.m. The program features the new **toolbox**, an enclosed trailer equipped with a variety of tools and supplies essential for clean-up events.

The ribbon cutting ceremony for the **toolbox** will take place in the Municipal Building's west parking lot. The Municipal Building is located at 2 North Main Street. Speakers for the program will include City of Temple Mayor Danny Dunn, City Manager Jonathan Graham, and Code Enforcement Manager Joseph Mudd.

The **team up to clean up!** program is designed to equip volunteer and neighborhood groups with the tools and support they need to host successful neighborhood clean-up events.

These resources are available at no cost to volunteer and neighborhood groups who wish to hold an event within the City of Temple. The City of Temple will also designate a City staff member as an event liaison to provide support and assistance for a successful program.

Program Guidelines:

- Each event must have a designated Event Coordinator;
- Events must have a minimum of 6 households or volunteers participating;
- Properties must be within the City of Temple city limits;
- All participants must sign liability waivers; and

· Resources must not be used for commercial purposes

Citizens wishing to obtain more information or schedule a clean-up event are invited to contact the City of Temple's Code Enforcement Office.

Program Overview

- Designed to equip volunteer groups with the tools and support they need to host successful neighborhood clean up events.
- The toolbox is an enclosed trailer equipped with a variety of tools and supplies essential for clean up events.
- The junktrunk is a dumpster which can be set in conjunction with a clean up event to facilitate the removal of junk and debris from the neighborhood.

Program Guidelines:

- Each event must have an Event Coordinator (Block Captain);
- Events must have a minimum of 6 households or volunteers participating;
- Properties must be within the City of Temple city limits;
- All participants must sign liability waivers; and
- Resources must not be used for commercial purposes.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015	YEAR 2
	USED OIL COLLECTION & RECYCLING	ID-7
Responsible Authority *Fleet Services Solid Waste Stormwater Program	BMP DESCRIPTION The City of Temple currently collects and recycles used oil from vehicle maintenance at the Fleet Service Center. Used oil from citizens is also accepted. This greatly reduces the City's disposal costs while also ensuring that the waste oils are not discharged into the local sewer system or creeks and waterways. The Recycling Center is open to the public but needs to be advertised. This program will incorporate an educational component for the City employees and the public. Several of the public education BMPs including the City's Stormwater Web Site (PEI-2) and PSAs (PEI-5) will be used to inform citizens of the environmental concerns of improper disposal of waste oils and disposal alternatives that are available.	
	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Advertise (Web page, PSA and brochure) • Document used oil disposal 	
	PROPOSED CHANGE None	
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
PROGRESS DURING CURRENT REPORTING PERIOD The City tracked the quantity of used oil and oil filters that were recycled by Fuel Blenders Inc. The public will also be able to find more Information for proper disposal of waste items on the City's web page.		
Implementation Activity	Measurable Goal	Completion Date

Recycle Your Christmas Tree with Temple Parks & Recreation

This January, keep your unwanted Christmas trees out of the landfill by joining Temple Parks and Recreation for the 2016 Christmas Tree Recycling Event. Residents may bring their **undecorated**, live Christmas trees to the Gober Party House (1516 West Avenue H) in Temple on Saturday, January 9th 2016 from 9:00 a.m. to noon and dispose of their trees, free of charge.

If you would like to dispose of your tree early, containers will also be placed at each of the City of Temple's recycling centers beginning December 21st.

Recycling Center Locations:

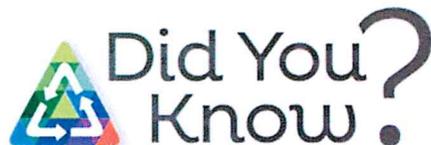

3015 Bullseye Lane
602 Jack Baskin Drive

GOT TAGGED?!

***Has your recycle cart not been emptied on pick up day?
Was a green tag placed on your recycle cart?***

If the answer is yes, please let us explain. In an effort to reduce the amount of contaminated recyclable materials being picked up, the City of Temple has been placing green tags on recycle carts and not emptying the cart until unauthorized items have been removed. Please refer to our [Curbside Recycling](#) page for details on accepted and unauthorized items in the curbside recycling program. Contaminated recyclable materials must be taken to the landfill, which defeats the purpose of our recycling program. Please help us continue to divert recyclables by properly disposing of items. Contact us 254-298-5725 if you have any questions.

Engage your community - connect to news, events and information you care about. [View more information...](#)

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	EROSION CONTROL (EC) SITE PLAN REVIEW		C-1
Responsible Authority *Construction Safety/Permitting Engineering/ Stormwater Program Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	BMP DESCRIPTION As part of their plan review procedures, the City of Temple will implement an erosion control permitting process, which includes reviews of construction plans for both builders and developers. The City will also develop procedures to catalog Construction General Permits (CGP), Stormwater Pollution Prevention Plans (SWPPP) and Notice of Intents (NOI) that are submitted to the City under the TPDES CGP.		
	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • EC site plan review • Track active construction sites 		
	PROPOSED CHANGE None		
PROGRESS DURING CURRENT REPORTING PERIOD The City of Temple tracks and monitors all construction projects within the city limits. The Stormwater Management Program reviews all Stormwater Pollution Prevention Plans and Stormwater Management Plans, conducts field inspections, tracks and monitors NOI's, NOC's and NOT's.			
Implementation Activity		Measurable Goal	Completion Date
<ul style="list-style-type: none"> • EC site plan review • Track Active construction sites 		<ul style="list-style-type: none"> • Number of plans reviewed • List of active sites 	Routine as Received

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	CONSTRUCTION INSPECTION		C-2
Responsible Authority *Engineering Stormwater Program Construction Safety/Permitting	BMP DESCRIPTION The City’s plan review procedures include on-site inspections to ensure compliance with the erosion control ordinance. The City’s Stormwater Program will perform visual stormwater Best Management Practices (BMP) inspections at all active construction sites. The Stormwater Program will also accept comments and public inquiries regarding construction sites. Procedures for the public to comment or inquire about construction projects will be developed and published on the City’s web-site. Public inquiries may be made via web site submittal, email, or phone. The City will establish procedures to track public comments/inquiries.		
	Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____		
	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Perform construction inspections • Track construction inspections/public inquiries • Update documents as necessary 		
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE None		
PROGRESS DURING CURRENT REPORTING PERIOD The Stormwater Management Program has adopted procedures for Construction Inspections. In summary, the Construction Safety department will supply weekly reports on Building Permits issued. Projects will be counted complete only after final walk-through and project site sign-offs in accordance with the adopted ESCCIP. The City adopted a SWPPP Inspection Guide to be used during all inspections			
Implementation Activity	Measurable Goal	Completion Date

Documentation Attached

List of Attachments: Inspection Procedures, Inspection Report Form, List of Inspections & Reports, and Building Permits

Construction Inspection Procedures

Permits:

1. TCEQ requires that all sites 1 acre or more be permitted. Sites under 1 acre may be required to be permitted if they are part of a common plan of development.
2. If a builder is developing one lot that is less than one acre and that lot is part of a greater common plan of development, they must be permitted by the entire acreage of the development.
3. The requirements differ for Small and Large Construction Site Notices. A Small Construction Site may not require a NOI provided they meet all requirements listed below.
 - Small Construction Sites
 - Develop a SWP3 that covers the entire site or all portions of the site for which the applicant is the operator. The operator must implement the plan prior to commencing construction activities.
 - Sign, certify and post a Construction Site Notice “in a location where it is safely and readily available for viewing by the general public, local, state, and federal authorities, prior to commencing construction”
 - Provide a copy of the Construction Site Notice to the City at least 2 days prior to commencement of construction activities.
 - Provide one copy of the Storm Water Pollution Prevention Plan and one copy of the construction site notice must be submitted (City Ordinance, 27-6 (a)).
 - Large Construction Sites
 - Develop a SWP3 that covers the entire site or all portions of the site for which the applicant is the operator. The operator must implement the plan prior to commencing construction activities.
 - Submit an NOI prior to commencing activities at least 7 days (mail) prior to commencing construction activities.
 - Post a copy of the NOI and Site Notice
 - Construction Site Notice: “In addition to the requirement to post the NOI, a primary operator of a large construction site must post the site notice...near the main entrance of the construction site. An operator of a small construction site or a secondary operator of a large construction site must post the site notice...to obtain authorization” (TXR150000, Part II, Section E.3)
 - Provide a copy of the NOI to the City at least 7 days prior to commencing construction (TXR150000)
 - NOI, SWP3, and Construction Site Notice must be submitted (City Ordinance, 27-6 (b)).

4. The City of Temple also requires that developers/builders be permitted under TPDES permit.

On-Site Inspection

1. Inspections are conducted at a minimum of quarterly and within 24 hours of a rainstorm of 0.5" or greater.
2. Ensure that CSN (construction site notice) and/or an NOI are posted. If there is not on-site location to store the SWP3, then the location of where the SWP3 is located must be posted.
3. Check all erosion and sedimentation controls for proper installation and that they are being maintained (repaired or replaced as necessary).
4. Inspect exits/entrances for proper installation and effectiveness. Look for other areas where vehicles and equipment are exiting and entering the work site without a proper exit/entrance installed.
5. Check for spill control measures and good housekeeping practices. Check concrete washout area if applicable.
6. Check for any additional BMP's (best management practices) that need to be installed on site to prevent pollution to storm water.
7. Take photos of any concerns that need to be addressed by the permittee.
8. During a final or closeout inspection, the site must have at least 70% of the native background vegetative cover on all unpaved areas and areas not covered by permanent structures or equivalent permanent stabilization measures.
9. Construction contractors are responsible for their site until a Notice of Termination has been submitted to the Stormwater Program.

Tracking and Review of Documentation

1. An active construction sites list is maintained for tracking purposes.
2. Assure that a SWP3 (storm water pollution prevention plan), CSN (construction site notice) and an NOI are received before construction starts if applicable.
3. When the SWP3, NOI's (notice of intent) and NOT's (notice of termination) are received, update list with information pertaining to the project.
4. Review all information submitted and submit any comments to the company's point of contact.

Reporting

1. Complete the Form # SW3: Construction Site Inspection Report.
2. Record any concerns or requirements for the permittee to comply with.
3. Attach pictures that were taken during the on-site inspection to the report.
4. Send the report to the developer or other storm water contact person (usually specified in the SWP3 or on the CSN/NOI).

Storm Water Pollution Prevention Plan:

1. TCEQ requires that developers have a SWP3 PRIOR to obtaining authorization. Developers are to have these on-site and available at all times. The City requires that a copy be provided to the City (See submittals)
 - “A SWP3 must be prepared prior to obtaining authorization under this general permit and implemented prior to commencing construction activities” (TXR150000, Part III, Section C)
 - “A SWP3 must be retained on-site or... a notice must be posted describing the location of the SWP3” (TXR150000, Part III, Section D.1)
 - “The SWP3 must be readily available at the time of an on-site inspection...” (TXR150000, Part III, Section D.1)
2. Refer to TXR150000, Part III, Section F on content requirements of the SWP3.

“The operator or owner of a premises, required to have a NPDES or TPDES permit to discharge storm water shall submit a copy of the SWP3 to the Director within 2 business days of the time that the operator submits notification to TCEQ that the SWP3 is available. The operator shall also submit a copy of the NOI, NOC, and NOT in accordance with the time frame provided for under the...permit” (City Ordinance, 27-43(g))

TCEQ and City Ordinance Requirements

Sediment/Pollution:

Sediment in the road is usually due to missing, damaged, or improperly installed erosion controls and tracking by vehicles. This is a violation of both TCEQ and the City Ordinance.

- “For the purpose of this permit, the term “pollutant” includes sediment” (TXR150000, Part 1, Section B)
- “No person shall introduce or cause to be introduced into the MS4 any sediment, silt, earth, soil, or other material associated with clearing, grading, excavating, or other construction activities, or associated with any land filling or other placement or disposal of soil, rock, or other earth materials, in excess of what could be retained on site or captured by employing sediment and erosion control measures or other BMPs to the maximum extent practicable” (City Ordinance, 27-30(d))
- “Any accumulation or deposit of soil material beyond the limits of the property or in city streets, alleys, or drainage facilities in an amount sufficient to constitute a threat to public safety and comfort or adversely impacts storm water quality as determined by the city is declared a public nuisance and shall constitute a violation of this article” (City Ordinance, 27-44(d))

Violations

1. TCEQ

“The permittee has the duty to comply with all permit conditions. Failure to comply with any permit condition is a violation of the permit and statutes under which it was issued, and is grounds for enforcement action, for termination coverage under this general permit, or for requiring a discharger to apply for and obtain an individual TPDES permit” (TXR150000, Part VII, 1)

2. City of Temple

“A premises shall be operated in strict compliance with the requirements of any applicable and required NPDES or TPDES permit. A person violates this Article if the person operates a premises in violation of a requirement of any such permit.” (City Ordinance, 27-43(h))

“A person performing work on a development commits an offense if the person conducts a land-disturbing or construction activity, and:

1. Has not developed and implemented a SWPPP...
2. Fails to install [SWPP] devices or to maintain [them] throughout the duration of the activity
3. Fails to remove off-site sedimentation...where such sedimentation results from the failure to implement or maintain [SWPP] devices
4. Allows sediment laden water to flow from a site without being treated through a [SWPP] device
5. Fails to maintain existing [SWPP] devices
6. Violates any provision of this section” (City Ordinance, 27-10(c))

City of Temple Administrative Enforcement

Before any enforcement actions can be taken, a notice or order must be provided. These include warning notice, notification of violation, and stop work order.

- Warning Notice
 - “When the Director finds that any person has violated, or continues to violate, any provision of this Article... the Director may serve ...a written warning notice, specifying the particular violation believed to have occurred and requesting that the person immediately comply...” (City Ordinance, 27-46(b))

- Notice of Violation (NOV)
 - “When the Director finds that any person has violated, or continues to violate, any provision of this Article... the Director may serve ...a written NOV. Within 10 calendar days of receipt of the NOV, the person shall submit an explanation of the violation and a plan for the satisfactory correction and prevention of reoccurrence, to include specific required actions and time lines for completion. If the alleged violator denies that any violation occurred and/or contends that no corrective action is necessary, an explanation of such denial shall be submitted within the same time period. Receipt of NOV is presumed to occur 5 calendar days of postmark.” (City Ordinance, 27-46(c))
 - “Notice of Violation shall contain:
 - The name and address of the owner or applicant
 - The address when available or a description of the building, structure, or land upon which the violation is occurring
 - A statement specifying the nature of the violation
 - A description of the remedial measures necessary to bring the land disturbing activity into compliance with this ordinance and a time schedule for the completion of such remedial action
 - A statement of the penalty or penalties that shall or may be assessed against the person to whom the notice of violation is directed
 - A statement that the determination of violation may be appealed to the municipality by filing a written notice of appeal within 15 days of service of notice of violation” (City Ordinance, 27-37)
- Stop work order
 - “When the Director finds that any owner or operator of a premises under construction has violated, continues to violate or threatens to violate any provision of this Article, or any order issued hereunder, the City may issue a stop work order which shall suspend or revoke the building or construction permit” (City Ordinance, 27-46(f))

Appeals

“In the event the developer or builder does not agree with a decision of the city engineer, they may appeal to the director of public works. Appeals from the director’s decision shall be automatically referred to the city manager for final decision, with due regard for the city engineer and public works directors recommendations. The city manager’s decision shall be rendered as soon as possible and shall be final. (City Ordinance, 27-47)

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	RECEIPT AND CONSIDERATION OF INFORMATION FROM PUBLIC		C-3
	BMP DESCRIPTION The City of Temple will utilize the existing Stormwater Management Program phone line as a stormwater hotline for citizens to report potential violations related to construction activities. This hotline will be aggressively promoted through several of the previously mentioned public education BMPs. Stormwater Program and/or Drainage Division personnel will respond and investigate these calls. Temple will also establish a location on their website for citizens to email these concerns or potential violations to City staff		
Responsible Authority *Stormwater Program Drainage Division Construction Safety			
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> Publicize stormwater hotline Track complaint investigations from hotline 		
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE None		
PROGRESS DURING CURRENT REPORTING PERIOD The City of Temple tracks and monitors public complaints from different departments including Streets, Solid Waste and Utility Services Departments. The Drainage Division receives and tracks public issues dealing with flooding and stormwater infrastructures. The Construction Safety Department also receives public complaints and investigates all calls received by their office.			
Implementation Activity		Measurable Goal	Completion Date

Date of Complaint	Complaint Made by:	Area of Complaint	Description of Complaint	Investigation Date	Investigator Conducted By:	Information Found at	Comments by Investigator	Date Closed
9/30/2015	Resident	Old Waco Road	Resident stated that their driveway is eroding due to stormwater	9/30/2015	Kara Godineaux	..\\Construction Sites-Reports & Photos\\The Plains at Riverside 2828 Old Waco Road\\093015	Inspected stormwater drains, some erosion of driveway. Culvert is one concrete pipe and one metal pipe. Dixon Paving dug out some of the ditch to help with SW flow. Rocks are being placed at entrance of new stormwater culvert to slow down water.	9/30/2015
10/28/2015	Resident	Richview (Canyon Ridge)	Resident stated that there was a large amount of sediment in the roadways	10/28/2015	Kara Godineaux and Scott Wilsey	..\\Construction Sites-Reports & Photos\\Canyon Ridge\\Permit YR 14-15\\102815	Spoke with Jackie Thornton of Thornton Homes about erosion control. Spoke with Chad McClean on 10/28/15 about erosion control measures and posting the CSN and NOI. Chad McClean had stated that they cleaned the area on 10/24/15 with sweepers for approximately 5 hours and replaced the silt fencing. Chad McClean stated that they would perform additional clean up on 10/28/15 and 10/29/15. He also stated that they would be inspecting over the weekend to ensure that the BMPs stayed in place. Phone call with Steve Shepherd on 10/29/15; Steve stated they would continue observing the area over the weekend and would be placing a copy of the CSN and NOI at the construction entrance on 10/30/15.	11/3/2015
11/2/2015	Resident	Highland Park	Resident stated that there was trackout on the roadways	11/2/2015	Kara Godineaux and Scott Wilsey	..\\Construction Sites-Reports & Photos\\Highland Park\\110215	Spoke with Contractor about placing rock at entrance of site. Rock was placed at the entrance within hours.	11/2/2015
11/17/2015	Railroad	River Cement Sales	Sediment buildup near the railroad	11/18/2015	Kara Godineaux	..\\Construction Sites-Reports & Photos\\Buzzi\\111715	spoke with Contractor to replace silt fencing. Will perform followup at a later date.	12/14/2015
12/9/2015	Resident	Friar's Creek	Concrete wash water being dumped into Friar's Creek	12/9/2015	Kara Godineaux and Scott Wilsey	resident complaint 120915	observed and pH tested creek (SWS# 12). No evidence to support concrete wash water going into Friars creek. pH within acceptable range. Provided resident with requested stormwater materials	12/11/2015

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	POST-CONSTRUCTION ORDINANCE		PC-1
Responsible Authority * Engineering	BMP DESCRIPTION Temple developed an ordinance to address post-construction runoff from new development and redevelopment projects to the extent allowable under State and local law. This ordinance provided for the requirement of post-construction BMPs and identification of the Creek Buffer Zone. Per TCEQ requirements, the City will continue to report enforcement actions taken in regards to this ordinance.		
	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Enforce ordinance • Track citations 		
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	PROPOSED CHANGE None		
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROGRESS DURING CURRENT REPORTING PERIOD The City of Temple implemented a new Post-Construction ordinance entitled "Chapter 27: Stormwater Management". The ordinance covers the Stormwater Management Plan and its' requirements, Design Criteria, Creek Buffer Zones, Inspection, Maintenance, and Enforcement. The ordinance is on the City of Temple's website for all residents of Temple to access.		
Implementation Activity	Measurable Goal	Completion Date	
<ul style="list-style-type: none"> • Enforce ordinance • Track citations 	<ul style="list-style-type: none"> • List of citations 	Routine as Received

Subchapter A. General Provisions.

- Sec. 27-11. Applicability.**
- Sec. 27-12. Compatibility with other permit and ordinance requirements.**
- Sec. 27-13. Definitions.**

Subchapter B. Requirements for Storm Water Management Plan Approval.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015	YEAR 2
	LONG TERM OPERATION AND MAINTENANCE OF BMPs	
Responsible Authority * Engineering	BMP DESCRIPTION The TPDES Small MS4 general permit requires cities to provide for the long-term operation and maintenance of the post-construction BMPs that are constructed in new development and redevelopment projects that disturb areas of one acre or greater. The effectiveness of a BMP can be significantly reduced by the lack of maintenance. The City assumes responsibility for maintenance of residential detention basins following construction. If a maintenance issue is identified, the Drainage Division of the Street Department will perform the actual maintenance activities. The Drainage Division is also responsible for the maintenance of stormwater drainage infrastructure, including creeks, concrete drainage flumes, grassed detention ponds, and grassy drainage easements. Proper maintenance of the post-construction BMPs requires knowing the location of each BMP to be maintained and a regular inspection process. This City's GIS personnel will develop and maintain GIS coverage of post-construction BMPs in the City.	
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • BMP maintenance • Update GIS coverage of permanent BMPs • Track Work orders. 	
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE None	
PROGRESS DURING CURRENT REPORTING PERIOD The City of Temple tracks the maintenance of stormwater drainage infrastructure, including creeks, concrete drainage flumes, grassed detention ponds, and grassy drainage easements.		
Implementation Activity	Measurable Goal	Completion Date
<ul style="list-style-type: none"> • BMP maintenance • Update GIS coverage of permanent BMPs • Track Work orders 	<ul style="list-style-type: none"> • Update BMP map • Maintenance Work Orders 	Routine

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	<p align="center">REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015</p>	<p align="center">YEAR 2</p>
	<p align="center">STORMWATER POLLUTION PREVENTION TRAINING</p>	<p align="center">GH-1</p>
<p>Responsible Authority * Engineering</p>	<p>BMP DESCRIPTION</p> <p>As required by the TCEQ permit, the City will implement annual training for MS4 staff. Staff who will be trained includes: Permitting, Public Works, Engineering, Parks and Leisure Services, Code Enforcement, Utility Services, Solid Waste, Fleet Services, Construction Safety, Street Services and Drainage Division. These trainings will focus on informing and training staff to do the job duties related to construction program and training staff to recognize signs of illicit discharge/illegal dumping. The City has developed a draft BMP/ Standard Operations (BMP/SO) manual (GH-2) for use by City staff. Meetings to discuss the draft BMP/ SO manual will be scheduled for the next reporting period.</p>	
<p>Appropriateness of BMP</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If No:</p> <p><input type="checkbox"/> Changes Proposed</p> <p><input type="checkbox"/> NOC Submitted Date _____</p>	<p>ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD</p> <ul style="list-style-type: none"> • Develop additional training material for city staff. • Distribute training to additional city staff. 	
<p>Measurable Goal Successfully Implemented?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p>	<p>PROPOSED CHANGE</p> <p>None</p>	
<p>PROGRESS DURING CURRENT REPORTING PERIOD</p> <p>The City of Temple received training material to be presented to several city departments on Stormwater education in the following years of the SWMP. This training material was presented to the Engineering Department to provide information on recognizing illicit discharges and construction stormwater awareness.</p>

Municipal Employee Training Series
Construction Stormwater Awareness

North Central Texas Council of Governments

Department of Environment & Development

DVD
Length 14:30

© 2011

Stormwater and the Construction Industry

Protect Natural Features

- Minimize clearing.
- Minimize the amount of exposed soil.
- Identify and protect areas where existing vegetation, such as trees, will not be disturbed by construction activity.
- Protect streams, stream buffers, wild woodlands, wetlands, or other sensitive areas from any disturbance or construction activity by fencing or otherwise clearly marking these areas.

Construction Phasing

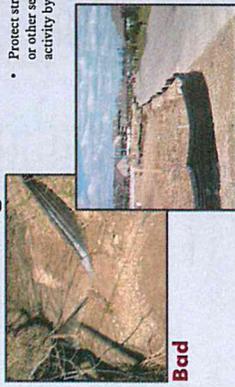

- Sequence construction activities so that the soil is not exposed for long periods of time.
- Schedule or limit grading to small areas.
- Install key sediment control practices before site grading begins.
- Schedule site stabilization activities, such as landscaping, to be completed immediately after the land has been graded to its final contour.

Vegetative Buffers

- Protect and install vegetative buffers along waterbodies to slow and filter stormwater runoff.
- Maintain buffers by mowing or replanting periodically to ensure their effectiveness.

Silt Fencing

- Inspect and maintain silt fences after each rainstorm.
- Make sure the bottom of the silt fence is buried in the ground.
- Securely attach the material to the stakes.
- Don't place silt fences in the middle of a waterway or use them as a check dam.
- Make sure stormwater is not flowing around the silt fence.

Site Stabilization

- Vegetate, mulch, or otherwise stabilize all exposed areas as soon as land alterations have been completed.

Maintain your BMPs!

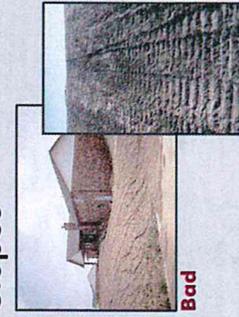

www.epa.gov/npdes/menuofbmps

Construction Entrances

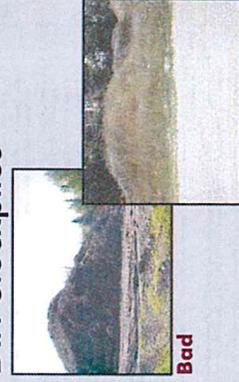

- Remove mud and dirt from the tires of construction vehicles before they enter a paved roadway.
- Properly size entrance BMPs for all anticipated vehicles.
- Make sure that the construction entrance does not become buried in soil.

Slopes

- Rough grade or terrace slopes.
- Break up long slopes with sediment barriers, or under drain, or divert stormwater away from slopes.

Dirt Stockpiles

- Cover or seed all dirt stockpiles.

Storm Drain Inlet Protection

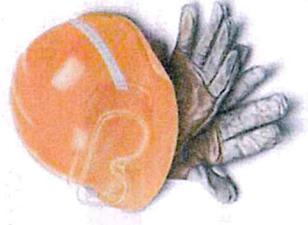

- Use rock or other appropriate material to cover the storm drain inlet to filter out trash and debris.
- Make sure the rock size is appropriate (usually 1 to 2 inches in diameter).
- If you use inlet filters, maintain them regularly.

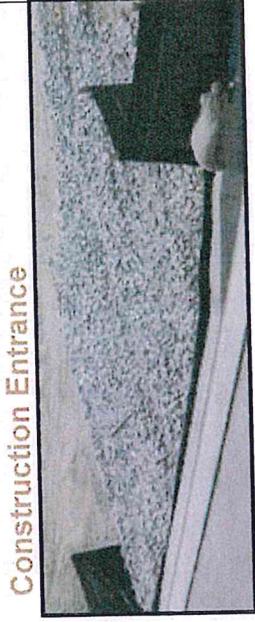

City of Temple Stormwater Program

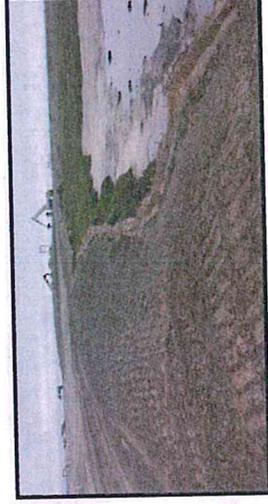

Construction Information and Requirements

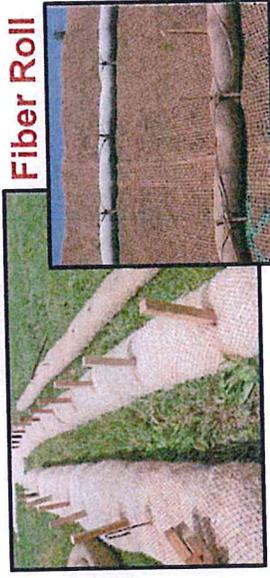

Stormwater Erosion Control Examples

Construction Entrance

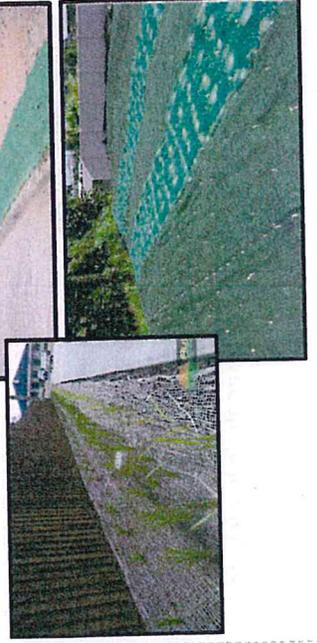

Rough Grade

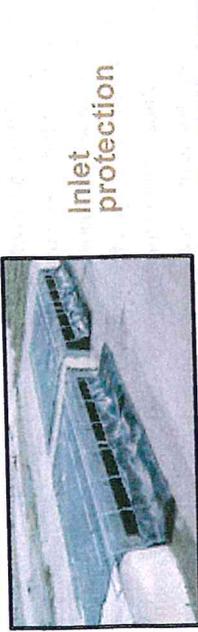

Fiber Roll

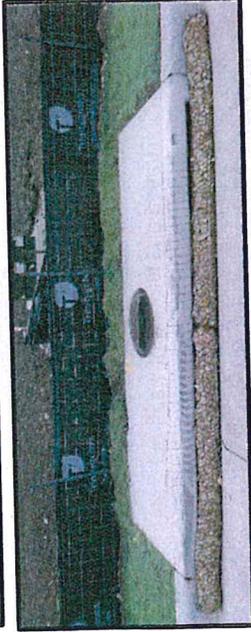

Geotextiles

Stormwater Erosion Control Examples

Inlet protection

Silt Fencing

Rip Rap

CONSTRUCTION ACTIVITIES

Includes but not limited to:

- Clearing
- Grading
- Paving
- Site Development
- Demolition
- Excavation
- Utility Installation
- Building Construction

PRE-CONSTRUCTION REQUIREMENTS

Projects less than 1 acre and are NOT part of a larger common plan of development:

- Apply for a City of Temple Permit

Small Construction Projects (more than 1 acre but less than 5 acres and NOT part of a larger common plan of development)

- Small Construction Site Notice (CSN)
- Develop and implement a SWPPP
- Apply for a City of Temple Permit
- Submit SWPPP and Small Construction Site Notice to City of Temple Stormwater Program

Large Construction Project (5 acres or more or less than 5 acres but part of a larger common plan of development)

- Submit an Notice of Intent (NOI)
- Prepare a Large Construction Site Notice for Primary Operator
- Apply for City of Temple Permit
- Develop and implement a SWPPP
- Submit SWPPP and NOI to City of Temple Stormwater Program

Compliance

To be in compliance you must:

- Prepare a SWPPP
- Prepare and submit an NOI (greater than 5 acres)
- Installation of Controls
- Submit proper paperwork to the City
- Posting of Appropriate Notices (NOI/CSN)

SWPPP

Stormwater Pollution Prevention Plan (SWPPP/SWP3)

- Documents the measures you take to minimize the discharge of pollutants from your site
- Should be updated frequently
- Must contain:
 - Site or project description (including maps)
 - Description of best management practices, structural controls, and permanent stormwater controls
 - Inspection findings
 - Maintenance schedules

CONSTRUCTION WASTE

Construction Waste is material produced directly or incidentally by construction activities.

Includes but is not limited to:

- Bricks
- Rebar
- Empty boxes
- Insulation
- Nails
- Electrical Wiring
- Empty buckets
- Concrete
- Wood
- Plasterboard

CHEMICALS OF CONCERN

Construction Chemicals consist of:

- Paints
- Oils
- Roofing Tar
- Herbicides
- Soaps
- Thinners
- Epoxy
- Sealers
- Fuels
- Solvents
- Concrete Curing Compounds
- Concrete Release Compounds
- Pesticides
- Mortar Mixes

SANITARY FACILITIES

Portable Facilities Should NOT be:

- Close to the Street
- Set on top of a Storm Drain Inlet

Portable Facilities Should be:

- Set on either side of the construction entrance for easy access and cleaning
- Set behind sediment or erosion controls to prevent chemicals from leaving the site

CONCRETE WASHOUT

Part V. of the Construction General Permit (TXR150000) authorizes the wash out of concrete trucks at construction sites provided the following requirements are met.

1. Direct discharge of concrete truck wash out water to surface water in the state, including discharge to storm sewers, is prohibited by this general permit
2. Concrete truck wash out water shall be discharged to areas at the construction site where structural controls have been established to prevent direct discharge to surface waters, or to areas that have a minimal slope that allow infiltration and filtering of wash out water to prevent direct discharge to surface waters. Structural controls may consist of temporary berms, temporary shallow pits, temporary storage tanks with slow rate release, or other reasonable measures to prevent runoff from the construction site.
3. Wash out of concrete trucks during rainfall events shall be minimized. The direct discharge of concrete truck wash out water is prohibited at all times, and the operator shall insure that its BMPs are sufficient to prevent the discharge of concrete truck washout as the result of rainfall or stormwater runoff
4. The discharge of wash out water must not cause or contribute to groundwater contamination.
5. If a SWP3 is required to be implemented, the SWP3 shall include concrete wash out areas on the associated site map.

YOUR RESPONSIBILITIES

You must:

- Keep trash from blowing
- Keep soil/dirt from leaving the site
- Keep erosion controls in clean and in good working order
- Keep construction waste and chemicals stored in a controlled area to minimize the transport of pollutants into the storm drains
- Follow your SWPPP
- Keep records

Large Construction: You are responsible for your construction site until you have submitted Notice of Termination (NOT) to TCEQ and the City of Temple Stormwater Program.

Small Construction: You are responsible for your construction site until you have completed the Construction Site Notice and submit it to the City of Temple Stormwater Program.

CITY OF TEMPLE

Best Management Practices/Standard Operations & Maintenance Manual

Acknowledgement

BMP/SO Manuals are required to be provided for all permanent Stormwater quality best management practices (BMPs) installed on a site. The purpose of the BMP/SO manual is to provide information to the person or entity responsible for operation and maintenance of the facility to ensure that the facility is adequately maintained to function as designed. The information that is provided in the BMP Manual will help the maintenance operations specific to the type of facility; and will provide mechanisms for ensuring that the long-term maintenance of the facility is performed. This manual is to be practiced by each City department that contributes to the data that is compiled for the annual reports to satisfy the Storm Water Management Program BMP Good Housekeeping GH-2. The following Manual requirements have been put together to fulfill requirements submitted and adopted by the Texas Commission of Environmental Quality permit to the City of Temple for execution.

1.0- Participating Departments

The SWMP Tech will submit an Annual Report to TCEQ that requires data to be provided by numerous other departments within the City. The annual report consists of information and practices achieved during the actual permit year which is December 13th through December 12th. The following Departments are required to provide the information to the Storm Water Management Program for annual reporting to TCEQ.

- Streets
- Drainage
- Parks & Leisure
- Mapping (GIS)
- Code Enforcement
- Utility Services
- Solid Waste
- Fleet Services

2.0- Information to be included:

- Storm Drain System Map.
- Illicit Discharge Reports.
- Illegal Dumping Reports.
- Feet of Sewer Line Cleaned.
- Number of Unauthorized Discharges.
- Totals for Household Hazardous Waste & Used Oil Collection Events.
- Permits issued by the City of Temple.

- Drainage Channel and Detention Pond Mowing.
- Pesticide Applicator Licenses.
- Automotive Waste Manifests.
- Street Sweeping Miles.
- Dechlorination Forms.

3.0- Participation

Each department in the City will practice what is learned from GH-1 Storm Water Pollution Prevention Training for City Employees. The information provided in that training will inform other departments on how to prevent storm water pollution using BMP's while on the job.

4.0- Emergency Action Plan

- Special operating procedures to be followed during emergency condition resulting from extreme weather conditions or from structural failure of a facility.

STORM WATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015	YEAR 2
	BMP/SO MANUAL FOR CITY FACILITIES	GH-2
Responsible Authority * Stormwater Program	BMP DESCRIPTION A Best Management Practices/Standard Operating (BMP/SO) Manual has been developed by the City's Stormwater Program for use by municipal employees and facility managers. Incorporating these standards into the day-to-day operation of the City facilities will help to keep the municipal storm system clean, and also serve to keep the City in compliance with the Texas Commission for Environmental Quality's (TCEQ) stormwater regulations.	
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> Evaluate BMP/SO effectiveness and update manual 	
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE None	
PROGRESS DURING CURRENT REPORTING PERIOD Minor changes and updates were made to the manual. Assure that all City owned or operator facilities that require a stormwater permit have coverage with TCEQ and document permit numbers.		
Implementation Activity	Measurable Goal	Completion Date

CITY OF TEMPLE

Best Management Practices/Standard Operations & Maintenance Manual

Acknowledgement

BMP/SO Manuals are required to be provided for all permanent Stormwater quality best management practices (BMPs) installed on a site. The purpose of the BMP/SO manual is to provide information to the person or entity responsible for operation and maintenance of the facility to ensure that the facility is adequately maintained to function as designed. The information that is provided in the BMP Manual will help the maintenance operations specific to the type of facility; and will provide mechanisms for ensuring that the long-term maintenance of the facility is performed. This manual is to be practiced by each City department that contributes to the data that is compiled for the annual reports to satisfy the Storm Water Management Program BMP Good Housekeeping GH-2. The following Manual requirements have been put together to fulfill requirements submitted and adopted by the Texas Commission of Environmental Quality permit to the City of Temple for execution.

1.0- Participating Departments

The Stormwater Program Specialist will submit an Annual Report to TCEQ that requires data to be provided by numerous other departments within the City. The annual report consists of information and practices achieved during the actual permit year which is December 13th through December 12th. The following Departments are required to provide the information to the Storm Water Management Program for annual reporting to TCEQ.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015	YEAR 2
	LANDSCAPE AND LAWN CARE	GH-3
Responsible Authority *Drainage Parks & Leisure	BMP DESCRIPTION This program focuses on education and certification of municipal employees to reduce water quality impacts from fertilizers and pesticides. It provides education on proper storage and application techniques. This certification program may provide information on alternative pest control techniques and explain dosage calculations. The certification program is administered by the Texas Department of Agriculture and requires an annual exam and continuing education credits for recertification. The City has employees that are licensed applicators and will continue to require their applicators to obtain annual training and certification.

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	<p align="center">REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015</p>	<p align="center">YEAR 2</p>
	<p align="center">ROADWAY CLEANING</p>	<p align="center">GH-5</p>
<p>Responsible Authority *Street Services</p>	<p>BMP DESCRIPTION</p> <p>Roadway cleaning is a practice intended to reduce the amount of sediment, floatable debris, and other pollutants discharged to receiving streams. Current street sweeper technology enables the sweeper to pick up fine-grained sediment particles that carry a substantial portion of the stormwater pollutant load.</p> <p>The City of Temple has two Tymco Regenerative Street Sweepers and will continue to perform street sweeping and cleaning at the current frequency. The Street Department submits monthly reports to Public Works documenting the number of lane miles that have been swept.</p>	
<p>Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date _____</p>	<p>ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD</p> <ul style="list-style-type: none"> • Continue existing street sweeping • Document lane miles from monthly reports 	
<p>Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p>	<p>PROPOSED CHANGE None</p>	
<p>PROGRESS DURING CURRENT REPORTING PERIOD</p> <p>The City of Temple Street Services currently operates two (2) Tymco 600 regenerative air street sweepers. It is important to note that during permit year 2, the street sweepers were down for maintenance or repair.</p> <p>The City logged approximately 929 hours of sweeping between December 2014 and December 2015. The City estimates that approximately 3,251.5 lanes miles of streets were swept during Permit Year 2.</p>		
<p>Implementation Activity</p> <ul style="list-style-type: none"> • Continue existing street sweeping • Document lane miles from monthly reports 	<p>Measurable Goal</p> <ul style="list-style-type: none"> • Monthly reports on lane miles • Sweep 2,400 lane miles 	<p>Completion Date</p> <p align="center">Continuous throughout year</p>

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015	YEAR 2
	STORM DRAIN SYSTEM CLEANING	GH-6
Responsible Authority *Street Department Drainage Division	BMP DESCRIPTION The purpose of this management practice is to reduce the amount of debris, trash and other pollutants in the storm drain system through maintaining and cleaning the stormwater inlets and drainage system on a regular basis. The Street Department Drainage Division currently maintains ditches and storm drain inlets through a periodic inspection and preventative maintenance program. The Drainage Division is responsible for the maintenance of stormwater drainage infrastructure, including creeks, concrete drainage flumes, grassed detention ponds, and grassy drainage easements. The City will develop formalized procedures for the disposal of dredge spoil, accumulated sediments and floatables from the MS4 as part of the BMP/SO manual.	
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> <input type="checkbox"/>	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Continue inspection, cleaning and maintenance • Update maintenance/cleaning log • Update BMP/SO manual for waste disposal(as needed) 	
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE None	
PROGRESS DURING CURRENT REPORTING PERIOD The City continued its inspection, cleaning and maintenance program for the storm drain system. The City's Job Order system tracks the activities related to storm drain system maintenance. The tracking system records the location, problem, and start/completion dates for each activity.		
Implementation Activity	Measurable Goal	Completion Date
<ul style="list-style-type: none"> • Continue inspection, cleaning and maintenance • Update maintenance/cleaning log • Update BMP/SO manual for waste disposal(as needed) 	<ul style="list-style-type: none"> • Maintenance/cleaning log • Updated BMP/SO pages 	Routine

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

	REPORTING PERIOD: DECEMBER 13, 2014 – DECEMBER 12, 2015		YEAR 2
	CITY-OWNED FACILITIES		GH-8
	BMP DESCRIPTION TCEQ requires all Level 3 MS4s to maintain an inventory of all City-owned facilities and their stormwater controls. Inspections are to be conducted and facilities prioritized by their potential to generate stormwater pollutants. High priority facilities are those which have a high potential to generate stormwater pollutants. Standard operating procedures and stormwater controls will be created for these high priority facilities. A map was be created indicating the location of each facility.		
Responsible Authority * Drainage Division Stormwater Program			
Appropriateness of BMP <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No If No: <input type="checkbox"/> Changes Proposed <input type="checkbox"/> NOC Submitted Date	ACTIVITIES PLANNED FOR NEXT REPORTING PERIOD <ul style="list-style-type: none"> • Update Standard Operating Procedures (SOPs) for high priority facilities • Inspection of all facilities in inventory on a yearly basis 		
Measurable Goal Successfully Implemented? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	PROPOSED CHANGE None		
PROGRESS DURING CURRENT REPORTING PERIOD An inspection was conducted on all high priority facilities except for the landfill. The inspection for the landfill will be conducted next reporting period. Some high priority facilities that were observed are not considered high risk to stormwater; therefore, were taken off of the list. Findings during inspection will be used to develop training for each individual facility. All lift station inspections are conducted at a minimum of twice per week by Brazos River Authority (BRA).			
Implementation Activity		Measurable Goal	Completion Date
<ul style="list-style-type: none"> • Develop City-owned facilities list. • Assess of facilities to determine high priority facilities. 		<ul style="list-style-type: none"> • Facility inspections list • List of high priority facilities • Standard Operating Procedures (SOPs) for High Priority Facilities 	12/11/15

Police Station	Maintenance Storage Building		10/6/2015
Sewer	Plant	2515 E Ave H	10/1/2015
Sewer	Lift Stations	Service Center: 3216 East Ave H	31 lift stations are checked at a minimum of 2 times per week. Additional checks are performed on an as needed basis
Sewer	Lift Stations	Wilson Park: Avenue H in Wilson Park	
Sewer	Lift Stations	Little Flock: 1949 Curtis B. Elliot Drive (by baseball fields)	
Sewer	Lift Stations	Williamson Creek: 2520 Hwy 53 East	
Sewer	Lift Stations	19th: 21 S. 19th Street (19th & Ave A)	
Sewer	Lift Stations	Troy: 4841 N. General Bruce Drive (135 service road north of NE loop)	
Sewer	Lift Stations	Hart Road: 6986 N. General Bruce Drive (truck stop parking lot)	
Sewer	Lift Stations	Wendland Road: 1775 Moores Mill Road	
Sewer	Lift Stations	PFG: 11313 NW HK Dodgen Loop (behind PFG)	
Sewer	Lift Stations	Airport: 7720 Airport Road (east of Temple Airport Entrance)	
Sewer	Lift Stations	FM 2305: 10520 W. Adams	
Sewer	Lift Stations	Oaks at Lakewood: 49 FM 2271	
Sewer	Lift Stations	FM 2271: 49 FM 2271	
Sewer	Lift Stations	Lago Terra: 564 Talon Drive	
Sewer	Lift Stations	Northcliff (FM 2271) 1170 FM 2271	
Sewer	Lift Stations	Oak Hills: 9309 Trail Ridge Drive (east of FM 317)	

Type of Facilities	Component	Location	Date of Inspection
Sewer	Lift Stations	Pea Ridge: 8011 Poison Oak Road (1/4 mile west of Pea Ridge Drive)	31 lift stations are checked at a minimum of 2 times per week. Additional checks are performed on an as needed basis
Sewer	Lift Stations	Tranum: 5615 Midway Drive	
Sewer	Lift Stations	55th: 2420 SW HK Dodgen Loop (shopping center parking lot)	
Sewer	Lift Stations	Hickory: 4611 Chestnut (between houses at the bottom of hill)	
Sewer	Lift Stations	Cliffs: 3310 Stratford Drive (east of bridge on north side of road)	
Sewer	Lift Stations	Steeplechase: 4902 Ascot Parkway	
Sewer	Lift Stations	Timber Ridge: 2921 Timber Ridge Drive	
Sewer	Lift Stations	Valley Ranch: 7245 Dubose Road (Valley Ranch subdivision, south of FM 93)	
Sewer	Lift Stations	Friars Creek: 2420 W. FM 93 HWY	
Sewer	Lift Stations	Las Colinas: 6555 Las Colinas Drive	
Sewer	Lift Stations	Action World: 3220 Little River Road (Tractor Supply Parking lot)	
Sewer	Lift Stations	Knob Creek: 3110 FM 3117 (just east of railroad on north side of roadway)	
Sewer	Lift Stations	30th: 1524 South 30th Street (dead end road to BNSF)	
Sewer	Lift Stations	40th: 2210 East Ave G (40th St. & East Ave G-dead end)	
Sewer	Lift Stations	Shallowford:	
Solid Waste Handling and transfer facilities	Recycling Center	601 Mama Dog Circle	
Landfills		3720 Tower Rd	will be conducted during next reporting period

Type of Facilities	Component	Location	Date of Inspection
Landfills		3709 E Ave H	will be conducted during next reporting period
Landfills		3801 E Ave H	will be conducted during next reporting period
Landfills		706 Landfill Rd	will be conducted during next reporting period

Standard Operating Procedures for the City of Temple High Priority Facilities

I. Summary

This procedure describes the Pollution Prevention Program for High Priority Facilities within the City of Temple. High Priority Facilities are facilities that pose a risk to stormwater. This program will be used to institute practices that will control pollutants and reduce stormwater impacts. High Priority Facilities include but are not limited to:

Type of Facilities	Location
Animal Shelter	620 Mama Dog Circle
Fire Station (Central)	511 N 3rd St
Fire Station (#2)	1710 E Ave H
Fire Station (#3)	3606 Midway Dr
Fire Station (#4)	411 Waters Dairy Rd
Fire Station (#5)	510 N Apache
Fire Station (#6)	3620 Range Rd
Fire Station (#7)	8420 W Adams Ave
Fire Station (#8/Training facility)	7600 Airport Rd
Landfill	3720 Tower Rd
Landfill	3709 E Ave H
Landfill	3801 E Ave H
Landfill	706 Landfill Rd
Parks and Leisure (Maintenance)	420 E. Barton
Parks and Leisure (Shop)	507 E. Calhoun
Police Station (Maintenance Storage Building)	209 E. Avenue A
Public Works Yard (Fleet Services-Garage)	3210 E Ave H
Solid Waste Handling and transfer facilities (Recycling Center)	601 Mama Dog Circle
Water Treatment (Warehouse/Storage)	601 Mama Dog Circle
Water Treatment (Plant)	4820 Parkside Dr

II. Inspections

A. Stormwater Program Office Responsibilities

1. A high priority facility site list with point of contacts is maintained for tracking purposes.
2. Inspections are conducted at a minimum of quarterly.
3. A map locating all high priority facilities is maintained.
4. Observations are recorded on Form #SW9: High Priority Facility Inspection Forms.
5. All storm drain inlets and outlets are monitored for possible illicit discharge.
6. Check for spill control measures and good housekeeping practices.
7. Check for any additional BMP's (best management practices) that need to be installed on site to prevent pollution to storm water.
8. Take photos of any concerns that need to be addressed by the point of contact.
9. A final report with photos is sent to the point of contact for the facility.

B. Responsibilities for High Priority Facilities

1. Perform a walkthrough inspection once per day
2. Inspections once per month to ensure that pollution prevention measures are appropriate
3. Items to inspect
 - a) *Parked vehicles should be monitored closely leaks*
 - b) *Pans are placed under any leaks to collect fluids for proper disposal or recycling*
 - c) *Observations are recorded and the stormwater program office is notified about significant spills*

III. Authorized Discharges

The following is a list of authorized discharges

- A. Water line flushing (excluding discharges of hyper-chlorinated water, unless the water is first de-chlorinated and discharges are not expected to adversely affect aquatic life);
- B. Runoff or return flow from landscape irrigation, lawn irrigation, and other irrigation utilizing potable water, groundwater, or surface water sources
- C. Discharges from potable water sources
- D. Diverted stream flows
- E. Rising ground waters and springs
- F. Uncontaminated ground water infiltration
- G. Uncontaminated pumped ground water
- H. Foundation and footing drains
- I. Air conditioning condensation
- J. Water from crawl space pumps
- K. Individual residential vehicle washing
- L. Flows from wetlands and riparian habitats
- M. De-chlorinated swimming pool discharges
- N. Street wash water
- O. Discharges or flows from firefighting activities (firefighting activities do not include washing of trucks, run-off water from training activities, test water from fire suppression systems, and similar activities)
- P. Other allowable non-storm water discharges listed in 40 CFR ' 122.26(d) (2) (iv) (B) (1)
- Q. Non-storm water discharges that are specifically listed in the TPDES Multi Sector General Permit (MSGP) or the TPDES Construction General permit (CGP)
- R. Other similar occasional incidental non-storm water discharges, unless the TCEQ develops permits or regulations addressing these discharges.

IV. Training

- A. Training for facility employees is conducted on an annual basis.
- B. Additional training may be conducted for new employees or on an as needed basis.

V. Materials/Wastes Generated

A. Chemicals

1. Solvents (paint/paint thinners)
2. Antifreeze
3. Brake fluid/brake lining
4. Batteries
5. Motor oils
6. Fuels (gasoline, diesel, kerosene)
7. Greases
8. Soaps in rinse water

B. Wastes

1. Trash/litter
2. Debris
3. Animal Wastes

VI. Pollution of Stormwater

A. Why is protecting storm water important?

1. Storm water is untreated and goes directly into our lakes, rivers, streams, creeks or oceans.
2. Wildlife use these bodies of water to live in and for food and water. They can become sick from pollution that travels with the storm water.

B. What types of pollution can travel with the storm water?

1. Oil, grease, metals and coolants from vehicles
2. Fertilizers and pesticides from gardens and homes
3. Bacteria from pet wastes
4. Trash: such as drink cans, food wrappers, etc.
5. Soil from construction sites and other bare ground
6. Soaps from car or equipment washing

C. Sediment

1. Sediment is the number one pollutant of the nation's rivers and lakes
2. Too much sediment can:
 - a) *Cloud the water and make it difficult or impossible for aquatic plants to receive the sunlight they need to grow.*
 - b) *Smothers aquatic habitat, clogs fish gills, and impedes navigation in our waterways*
 - c) *Fills gravel spaces and smothers fish eggs and juvenile fish.*

- d) *Carry nutrients that can cause algae blooms*

VII. Pollution Prevention Practices

A. Chemicals

Chemicals should be stored in secured containers to protect contact with stormwater. It is recommended that chemicals be stored off of ground and under cover. Inspections must include checking for leaks and spills.

B. Spills

1. Use as little water as possible to clean spills, leaks and drips. Rags should be used to clean small spills, dry absorbent material for larger spills, and a mop for general cleanup. Mop water must be disposed of down the sink or toilet and never down a stormwater drain.

2. Spill kits should contain:

- a) *Bucket with screw top lid and handle*
- b) *Absorbent socks*
- c) *Absorbent pads*
- d) *Goggles*
- e) *Nitrile gloves*
- f) *Disposable bags to dispose of used materials*
- g) *Contact list*

This kit could be used to mop up small oil and grease spills. Other types of kits are designed for specific spill types – other chemicals, other viscosities, etc.

C. Equipment

1. Equipment stored outside should be

- a) *Undercover*
- b) *Drained of equipment fluids*
- c) *Drip pans to collect leaks or drips*

- D. Fueling
 - 1. Operators must be trained on the fueling process
 - 2. Specific clean up material must be on hand
 - 3. Instructions should be posted for safe operation
 - 4. Operators must be present during fuel transfer

- E. Unloading Liquid or Solid Materials
 - 1. Proper housekeeping
 - 2. An employee must be present to accept the materials
 - 3. Have a spill kit located nearby

- F. Maintenance
 - 1. Maintenance must be performed indoors
 - 2. Clean up leaks and spills immediately

- G. Landscape Maintenance and Construction
 - 1. Follow written procedures on pesticides and fertilizer application
 - 2. Store pesticides properly
 - 3. Do not dispose of landscape debris near drains

- H. Washing of Vehicles/Equipment
 - 1. Wash water must drain to the sanitary sewer and not the storm drain. Wash racks that drain to the sanitary sewer may be used.
 - 2. Biodegradable soap must be used
 - 3. Fire hoses must be wash in a manner that prevents wash water from entering the storm drain

- I. Scrap Metal
 - 1. All scrap metal removed from equipment or vehicles that may contribute pollutants to surface of water or groundwater due to wash off from rainwater contact must be covered and raised off the ground.
 - 2. Cover or enclose stockpiles of any material that has the potential to contaminate stormwater runoff.
 - 3. Stockpiled materials must not enter the storm drainage system.

J. Wastes

1. Hazardous wastes

- a) *The number of solvents used should be kept to a minimum to make recycling easier and to reduce hazardous waste management cost.*
- b) *Do all liquid cleaning at a centralized station to ensure solvents and residues stay in one area.*
- c) *Locate drip pans and draining boards to direct solvents back into solvent sink or holding tank for reuse*

2. Animal wastes

- a) *Animal wastes should be removed from the ground and disposed of in the trash*
- b) *Pet waste bags should be available to all employees*

K. Trash

1. Trash should be collected in secure containers, preferably under cover.

2. Trash on the ground should be collected immediately and disposed of properly.

C. Stormwater Management Program Status

		STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT December 13, 2014 – December 12, 2015			TABLE 1 – YEAR 2 BMP STATUS	
		The table below lists the implementation activities and measurable goals developed for each BMP for Year 2. See individual BMP sheet for details and documentation.				
BMP	Description	Implementation Activity	Measurable Goal	Status		
				New (N) or Revised (R)	Start Date	Status/ Completion Date
PEI-1	Stormwater Education to Students	Nature Fest, Career Day at TISD	Pictures and posters of events		12/13/14	10/10/15 11/6/15
PEI-2	Stormwater Web Site	Develop link to Annual Reports Maintain web-site link	1 Annual Reports link		12/13/14	12/11/15
PEI-3	Stormwater Brochures	Print and distribute new brochure and door hangers	List of distributions for Brochures & door hangers		12/13/14	12/11/15
PEI-4	Utility Bill Inserts	Distribute 1 insert	Distribute 1 insert per water customer		12/13/14	6/30/15
PEI-5	Public Service Announcements	Create 6 Stormwater Public Service Announcements & broadcast them.	6 PSA's		12/13/14	See BMP's
PEI-6	Storm Drain Marking	Advertise program to organizations Hold/Sponsor 1 marking event Update marked inlet GIS coverage	At least 1 marking events		12/13/14	12/5/15
PEI-7	Reforestation Programs	Cosponsor 1 tree planting event Post event on activities calendar on website 1 media announcement (PSA)	Photos of event 1 webpage posting 1 PSA		12/13/14	2/14/15
PEI-8	Stakeholder Committee	Hold 1 stakeholder meeting to review annual report	Attendance sheet Meeting Minute		12/13/14	1/12/15
ID-1	Storm Drain System Map	Locate and map outfalls –GPS Update system map – All Watersheds	Updates system map All watersheds		12/13/14	12/11/15
ID-2	Dry Weather Screening	Walk accessible reaches Perform test for all watersheds Maintain tracking system and verify GIS map	Screening Map for all watersheds		12/13/14	10/1/15
ID-3	Illicit Discharge Investigations	Develop procedures for responding to illicit discharges and spills	Procedures for responding to illicit discharges and spills		12/13/14	9/8/15
ID-4	Reduce Illegal Dumping	Enforce ordinance/maintain tracking system Publicize with 1 PSA	1 PSA List of citations		12/13/14	1/3/15 4/16/15-4/18/15 5/13/15 10/3/15 11/5/15
ID-5	Reduce Sanitary Sewer Overflows	Cleaning/preventative maintenance Staff tracking of areas cleaned	Clean 270,000 linear feet/year		12/13/14	Routine
ID-6	Household Hazardous Waste Disposal	Continue to host annual collection day Advertise in newspaper, webpage, and PSA Document quantity of material collected	1 Web and newspaper posting and 1 PSA 1 HHW collection event Quantity of HHW collected		12/13/14	10/3/15
ID-7	Used Oil Collection & Recycling	Advertise (web page and PSA) Document used oil disposal	1 Web posting and 1 PSA Document disposal		12/13/14	10/3/15

C. Stormwater Management Program Status

C-1	Erosion Control Site Plan Review	EC site plan review Track active construction sites	Number of plans reviewed List of active sites		12/13/14	Ongoing
C-2	Construction Inspection	Develop written inspection procedures and report form Perform construction inspections Track construction enforcement	Inspection procedures and report form List of inspection reports Enforcement list		12/13/14	Ongoing
C-3	Receipt and Consideration of Information from Public	Publicize stormwater hotline Track complaint investigations from hotline	Webpage screen capture List of public comments and investigations		12/13/14	12/11/15
PC-1	Post- Construction Ordinance	Enforce ordinance	List of citations		12/13/14	Ongoing
PC-2	Long Term Operation and Maintenance of BMPs	BMP maintenance Update GIS coverage of permanent BMPs Track work orders	Update map of detention ponds and drainage canals Maintenance Work Orders		12/13/14	Ongoing
GH-1	Stormwater Pollution Prevention Training	Develop training for City staff to recognize illicit discharge Develop training for City staff involved in construction projects	Training procedures/material		12/13/14	11/30/15
GH-2	BMP/SOP Manual for City Facilities	Evaluate BMP/SO effectiveness and update manual	Updated manual pages		12/13/14	12/11/15
GH-3	Landscape and Lawn Care	Annual training for applicators Document training and copies of licenses	Copies of licenses		12/13/14	12/11/15
GH-4	Vehicle Maintenance	Maintain oil/water separator	Maintain logs for Oil/Water separator		12/13/14	Monthly
GH-5	Roadway Cleaning	Develop implementation schedule and waste disposal procedures Continue existing street sweeping Document lane miles from monthly reports	Implementation schedule and waste disposal procedures Monthly reports on lane miles Sweep 2400 lane miles		12/13/14	Monthly
GH-6	Storm Drain System Cleaning	Continue inspection, cleaning, and maintenance Update maintenance/cleaning log	Maintenance/cleaning log		12/13/14	Monthly
GH-7	Non-Stormwater Discharges	Monitor Development of new Fire Training Facility Use Dechlorination equipment for water line flushing	Photos of the fire training facility Document equipment use		12/13/14	Routine
GH-8	City-Owned Facilities	Develop facility and stormwater control inventory Assessment of facilities to determine high priority facilities Develop Standard Operating Procedures for High Priority Facilities	Facility and stormwater control inventory Inspection of high priority facilities Develop Standard Operating Procedures for High Priority Facilities		12/13/14	12/11/15

C. Stormwater Management Program Status

STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT

December 13, 2015 – December 12, 2016

Table 2 - Year 3 Planned Activities

The table below lists the Year 3 planned activities and measurable goals developed for each BMP.

BMP	Description	Year 3 Planned Activities	Year 3 Measurable Goal
PEI-1	Stormwater Education to Students	Update educational materials Educate students and public	Educate Temple ISD students Educate public at Nature Fest
PEI-2	Stormwater Web Site	Update post-construction web site information Maintain web-site link	Update post-construction web site
PEI-3	Stormwater Brochures	Distribute brochures to kiosks Distribute door hangers	Distribute a minimum of 500 brochures Distribute a minimum of 250 door hangers
PEI-4	Utility Bill Inserts	Distribute 1 insert per water customer	Distribute 1 insert in 1 monthly bill for every water customer
PEI-5	Public Service Announcements	Select stormwater messages Broadcast 6 stormwater messages	6 PSA's
PEI-6	Storm Drain Marking	Advertise program to organizations Hold/Sponsor 1 marking events Update marked inlet GIS coverage	At least 1 marking event
PEI-7	Reforestation Programs	Cosponsor 1 tree planting event Post event on activities calendar on website 1 media announcement	1 webpage posting, 1 PSA & photos of event
PEI-8	Stakeholder Committee	Hold 1 stakeholder meeting to review annual report	Sign in sheet, meeting notes, presentation & invitation.
1	Storm Drain System Map	Locate and map outfalls –GPS Update system map	Update system map
ID-2	Dry Weather Screening	Walk accessible reaches Perform test for all watersheds Maintain tracking system and verify GIS map	Screening Map for all watersheds
ID-3	Illicit Discharge Investigations	Update procedures for tracing and removing illicit discharge sources Perform inspections	If necessary, update procedures for tracing and removing illicit discharges List of investigation types and locations
ID-4	Reduce Illegal Dumping	Enforce ordinance/maintain tracking system Publicize with 1 PSA	1 PSA List of citations
ID-5	Reduce Sanitary Sewer Overflows	Cleaning/preventative maintenance Staff tracking of areas cleaned	Clean 270,000 linear feet/year
ID-6	Household Hazardous Waste Disposal	Continue to host annual collection day Advertise in newspaper, webpage, and PSA Document quantity of material collected	1 Web and newspaper posting and 1 PSA 1 HHW collection event Quantity of HHW collected
ID-7	Used Oil Collection & Recycling	Advertise (web page and PSA) Document used oil disposal	1 Web posting and 1 PSA Document disposal
C-1	Erosion Control Site Plan Review	EC site plan review Track active construction sites	Number of plans reviewed List of active sites
C-2	Construction Inspection	Perform construction inspections Track construction enforcement	List of inspection reports Enforcement list
C-3	Receipt and Consideration of Information from Public	Publicize stormwater hotline Track complaint investigations from hotline	Webpage screen capture List of public comments and investigations
PC-1	Post-Construction Ordinance	Enforce ordinance	List of citations

C. Stormwater Management Program Status

PC-2	Long Term Operation and Maintenance of BMPs	BMP maintenance Update GIS coverage of permanent BMPs Track work orders	Update map of detention ponds and drainage canals Maintenance Work Orders
GH-1	Stormwater Pollution Prevention Training	Provide training to new facility and maintenance staff Document training attendance	1 employee training List of attendees/date
GH-2	BMP/SOP Manual for City Facilities	Evaluate BMP/SO effectiveness and update manual	Update manual pages
GH-3	Landscape and Lawn Care	Annual training for applicators Document training and copies of licenses	Copies of licenses
GH-4	Vehicle Maintenance	Maintain oil/water separator	Maintain logs for Oil/Water separator
GH-5	Roadway Cleaning	Continue existing street sweeping Document lane miles from monthly reports	Monthly reports on lane miles Sweep 2400 lane miles
GH-6	Storm Drain System Cleaning	Continue inspection, cleaning, and maintenance Update maintenance/cleaning log	Maintenance/cleaning log Update BMP/SO pages if necessary
GH-7	Non-Stormwater Discharges	Use dechlorination equipment for water line flushing	Document equipment use
GH-8	City-Owned Facilities	Update Standard Operating Procedures for high priority facilities Inspection of all facilities in inventory	Update SOP for high priority facilities Perform inspections

C. Stormwater Management Program Status

	STORMWATER MANAGEMENT PROGRAM – ANNUAL REPORT December 13, 2014 – December 12, 2015	TABLE 3 – YEAR 2 MEASURABLE GOAL STATUS
	The table below lists the measurable goals developed for each BMP for Year 2, success and proposed changes. See individual BMP sheet for details and documentation.	

BMP	Description	Measurable Goal(s)	Success	Proposed Changes (submit NOC as needed)
PEI-1	Stormwater Education with NPS Models	Update educational material, Public Works Week, Nature Fest, Career Day at TISD.	Stormwater education provided to 250 students from Temple ISD.	None
PEI-2	Stormwater Web Site	1 Annual Reports link	1 Annual Reports link created	None
PEI-3	Stormwater Brochures	Print and distribute stormwater brochure and door hangers.	Distributed ~750 brochures and ~250 door hangers	None
PEI-4	Utility Bill Inserts	Distribute 1 insert	One insert per water customer in the June water bill.	None
PEI-5	Public Service Announcements	6 PSA's	PEI-1, PEI-6, PEI-7, ID-4, ID-6 & ID-7	None
PEI-6	Storm Drain Marking	At least 1 marking event	Hosted 1 event with the Girl Scouts participation.	None
PEI-7	Reforestation Programs	Host 1 event, post to city's website & 1 PSA.	20 trees were planted at Lions Park.	None
PEI-8	Stakeholder Committee	Attendance sheet, presentation, meeting notes and invitation	Conducted Stakeholder Committee Meeting	None
1	Storm Drain System Map	Updated system map All watersheds	Provide an updated system map of all watersheds in the City of Temple.	None
ID-2	Dry Weather Screening	Screening map For all watersheds	Screen all watersheds and provide testing results.	None
ID-3	Illicit Discharge Investigations	Procedures for responding to illicit discharges and spills	Develop procedures & investigate reports.	None
ID-4	Reduce Illegal Dumping	1 PSA List of citations	Ordinance enforced, 1 PSA & tire recycling event.	None
ID-5	Reduce Sanitary Sewer Overflows	Clean 270,000 linear feet/year	Cleaned greater than 270,000 linear feet	None
ID-6	Household Hazardous Waste Disposal	1 HHW collection event 1 newspaper ad/webpage Quantity of HHW collected	The city hosted a Household hazardous waste event & documented amount collected.	None
ID-7	Used Oil Collection & Recycling	1 Web posting and 1 PSA Document disposal	Documentation of disposal & 1 PSA.	None
C-1	Erosion Control Site Plan Review	Number of plans reviewed List of active sites	Document & enforce the city's requirements for plans submitted.	None
C-2	Construction Inspection	Inspection procedures and report form List of inspections Enforcement list	Conduct stormwater inspections on all active construction sites & enforce SWPPP requirements.	None
C-3	Receipt and Consideration of Information from Public	List of public comments and investigations	Publicize stormwater hotline & track & investigate complaints.	None
PC-1	Post-Construction Ordinance	List of citations	Ordinance enforced and citations tracked.	None
-2	Long Term Operation and Maintenance of BMPs	Updated BMP map Maintenance Work orders	Mow detention ponds & drainage channels, create a map of maintained areas.	None

C. Stormwater Management Program Status

GH-1	Stormwater Pollution Prevention Training	Training procedures/materials	Training materials and attendance sheet	None
GH-2	BMP/SOP Manual for City Facilities	Updated manual pages	Update manual and ensure that appropriate facilities are permitted.	None
GH-3	Landscape and Lawn Care	Copies of licenses	Maintain a copy of pesticide applicator licenses.	None
GH-4	Vehicle Maintenance	Maintenance logs Oil/water separator	Document maintenance on oil/water separator.	None
GH-5	Roadway Cleaning	Implementation schedule and waste disposal procedures Monthly reports on lane miles swept 2400 lane miles	Cleaned greater than 2400 lane miles	None
GH-6	Storm Drain System Cleaning	Maintenance/cleaning log Updated BMP/SO pages	Inspect, maintain and clean storm drains.	None
GH-7	Non-Stormwater Discharges	Document equipment use	Use dechlorinator for water line flushing.	None
GH-8	City-Owned Facilities	Developed SOP for High Priority Facilities Facility and stormwater control inventory Inspection of high priority facilities	Inspection of high priority facilities owned & operated by the City of Temple.	None

D. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
